

Climate Adaptation and Resilience Services (CAReS)

Assess and manage climate risk impacts on your business

Natural disasters are increasing in frequency and intensity, driving high economic losses each year. CAReS helps you understand exactly what climate change means for your business, so you can act where it matters most.

Protect your critical assets:
Prioritize resilience investments at high-risk locations

Support disclosures:
Adopt best practices aligned with regulatory requirements

Assess investments:
Evaluate exposure and risk in investments and M&A

Developed with clients. Built for decision-makers.

CAReS vulnerability self-assessment helps you to plan smarter resilience investments. Intuitive dashboards provide climate risk scores at a glance, helping you prioritize locations at risk, monitor physical or financial impacts, and evaluate your loss exposure over time. Interactive maps, reports and datasets empower you to make the right business decisions.

Dedicated consultancy resilience services

Enjoy access to tailored resilience consultancy services – to help you put the right risk mitigation measures in place, reduce downtime, safeguard assets, and support disclosures.

- On-site surveys
- Climate hazard exposure deep dives
- Expert location vulnerability assessments
- Risk reduction and mitigation strategies
- Financial loss quantification

Resilience is a journey, not a destination. CAReS empowers you to proactively manage climate risks, limit potential disruptions and stay one step ahead.

Together we're all in **from A to Z.**
