

FOR IMMEDIATE RELEASE

3Dsellers Unveils Shipping Tracker To Automate Customer Shipping Updates

Added capabilities allows seamless integration with eBay's tracking details and improves customer service with proactive notifications.

Herzliya, Israel - February 20, 2019 - 3Dsellers, an all-in-one solution for fast-growing and established online merchants, announces the launch of a new management tool to help automate shipping updates to customers. This latest 3Dsellers solution is supporting over 100 domestic and international shipping couriers and increases customer service by notifying buyers of any delivery updates, saving merchants time while increasing responsiveness and credibility of their business.

“Building trust with customers significantly improves any eCommerce business,” says Alex Flom, CEO and Co-founder of 3Dsellers. “We created an automated solution for high-level engagement with customers with valuable for them information. 3Dsellers Shipping Tracker is easy to set-up, includes fully customizable message templates for appropriate triggers and alerts sellers when an immediate attention is needed.”

All messages sent through 3Dsellers Shipping Tracker are personalised and can be differentiated by couriers and sending time according to the delivery status. A total of eight (8) message templates are included in the software with an ability to create a custom message for any delivery trigger.

--more--

Additional features of the 3Dsellers Shipping Tracker include:

- Total sales delivery overview dashboard
- Advanced filtering capabilities
- A selection of alerts for the seller
- Blacklisting

About 3Dsellers

3Dsellers is a web software platform enabling marketplace sellers to run their business efficiently and grow sales.
