Chainlink Already Powers Solana's Leading DeFi Protocols

GMX-Solana Adopts Chainlink Data Streams as Official Data Oracle Solution on Solana

The GMX-Solana project is a soon-to-launch expansion of GMX to the Solana blockchain

Jupiter Perps Taps Chainlink for Real-Time DeFi on Solana

Jupiter, one of Solana's top DeFi protocols with more than \$2 billion in total value locked (TVL), just took a major leap forward

Kamino Finance Integrates Chainlink Data Streams with \$2B TVL for Low-Latency Solana DeFi Market Data

Kamino Finance, the largest decentralized finance (DeFi) lending protocol on the Solana blockchain with over \$2 billion in total value locked (TVL), has integrated Chainlink Data Streams to enhance its market data capabilities

CCIP is Live On Solana

Enabling the Secure Transfer of Value and Data
Across EVM, SVM and the Entire Capital Markets

CCIP Provides Security and Programmable Token Transfers

AVAILABLE FEATURES

Move Tokens and Value

Send Messages

Move Value + Messages Combined

\$19B+ in Value Can Now Securely Bridge to Solana via CCIP

Major BTCFi, Stablecoin, and RWA Projects Coming to Solana

AI platforms and Agents Adopting CCIP and the CCT Standard to Extend Agent Capabilities and Assets to Solana

Enabling Next Generation Tokenized Funds for UBS and SBI

- Investors submit subscription or redemption orders for UBS's tokenized fund through SBI Digital
- Orders are sent to the Digital Transfer Agent Smart Contract and held in pending status
- Fund Administrator calculates and validates the fund's NAV for the dealing cycle
- Chainlink securely delivers the validated NAV data to the Digital Transfer Agent Smart Contract
- Digital Transfer Agent (DTA) smart contract calculates required token amounts based on NAV and updates order status inside of smart contract
- Digital Transfer Agent (DTA) uses Chainlink CCIP to trigger validated minting/burning by the tokenized fund contract, possibly across various chains
- Fund Contract mint/burns tokens and SBI Digital Market allocates shares to investors in backend
- Throughout the entire process, UBS maintains complete visibility of all fund operations through Chainlink's oracle network, which provides real-time data flows between their traditional systems and the blockchain-based Digital Transfer Agent - enabling seamless integration of this new tokenized fund service into their existing infrastructure

Chainlink Is Collaborating With the Leading Financial Institutions

Institutional Usage is Live and More Going Towards Production

Swift Interoperability

DTCC SmartNAV

Participating Firms

Chainlink AI Oracles

Financial And Market Infrastructures
