## SOLIDS CONTROL

All projects requiring fluid circulation are supported by our new state-of-the-art, electric portable mud cleaners equipped with:

- Dual Haged and bottom joint mud compartments.
- Independently driven linear motion shaker tables.
- High capacity de-watering cones.
- Dewatering cones.
- 3 cu. yd. holding containment and transport bins.
- Complete drilling fluids testing kits.

Our modified solids separation equipment sub WDC apart from other drilling companies by providing the ability to maintain a drilling fluid suspended solids content of 0.25%.

The WDC drilling fluids program is vital to providing our clients with highly efficient wells with drastically reduced well development time. There is no comparison to mud programs utilizing dig pits or inferior above ground solid separation technology.

## AIR & MUD ROTARY

All air and mud rotary drilling rigs, support equipment, and down hole tooling and drilling industry. Most rigs are equipped with factory installed casing hammers and are designed to easily convert between air and mud rotary to address changing site conditions.

### wednesday • april 25

8a-12:30p CPR/first aid  
1:30-3p Drilling 101  
3-4p In-situ Remediation  
4-5p Drilling Fluids Management

### thursday • april 26

8:30a-5:30p Hazwoper 8-hour Update  
5:30-7:00p Happy Hour & 1/2

### friday • april 27

8:30a-10a Drilling 101  
10-11a Direct Push Technologies  
11a-12p In-situ Remediation  
1-2p Sonic Drilling  
2-3p Drilling Fluids Management  
3-4p Submersible Pump Selection

all classes are complimentary  
and first come first served

seating is limited to  
RSVPs only

certificate of completion will  
be provided for each hour of  
seminar attendance

# education

## all complimentary

refreshments and lunch will be provided

wednesday - friday  
april 25 - 27, 2012

we will be presenting multi-media seminars on:

- drilling fundamentals 101
- sonic drilling
- in-situ remediation tools & technologies

in addition...

- red cross certified first aid & cpr
- OSHA 8 hr hazwoper update

# safety training

### first aid & cpr training

this 5 hour session will receive American Red Cross certification. Your family can attend this training.

this 8 hour session will receive a certification class meeting the requirements of OSHA 1910.33.

Drilling fundamentals of drilling including hollow drill pipe, casing hammer, stratex under-reaming, annular seal and aquifer cross contamination. This is excellent for new field personnel and a refresher. Attendees will leave the training knowing what drilling method is appropriate for differing sites.

Many investigation procedures and remediation techniques including dual wall sampling, discrete water sampling, and well construction in this hour. Use of geophysical instrumentation.

Drilling fundamentals of drilling mud and the importance of utilizing appropriate mud properties. Utilizing portable mud cleaners and other technology is also discussed.

### sonic drilling

An overview of the sonic drilling fundamentals, well construction, sonic head design, depth discrete water sampling, telescoping and over-reaming techniques, depth and diameter capabilities, and cross contamination prevention strategies.

### in-situ remediation tools & technologies

An introduction to the considerations and logistics involved in planning and executing in-situ injection projects. Topics covered include: tools and strategies for using temporary injection points and permanent injection wells, pump selection, mixing and batching systems, product measurement in the field and more. The seminar takes a strictly technical approach to getting products in the ground at the desired target zones and is applicable to a wide range of remediation materials from powerful chemical oxidation to food grade enhanced bio-remediation products.

### submersible pump selection

This one-hour presentation starts with a description and review of the internal workings of a submersible pump. An actual "cut-away" pump is provided for the attendee's hands-on experience. Pump system terminology is presented as the seminar moves into pump sizing and selection. After a review of pump selection criteria, the class will be presented with a sample case study and exercise. The exercise sequentially revisits the seminar and gives students an opportunity to calculate the necessary system parameters to choose a pump based on data provided.

### happy hour & a half

Join us for tiny bites and libations.

## 11 STEPS To Bloom Your Life

For those of you ready to work intentionally to bloom your life in collaboration with a lifestyle guide, please join us online in the Pink Balloon U. community so that you can share your story and get ongoing inspiration. Everyone's personal transformation stories are valuable, and I hope to hear yours. Whether you join the Pink Balloon tribe or work through this workbook, may you shape the path to a future filled with peace, love, and joy. You are worth it!

For those of you ready to work intentionally to bloom your life in collaboration with a lifestyle guide, please join us online in the Pink Balloon U. community so that you can share your story and get ongoing inspiration. Everyone's personal transformation stories are valuable, and I hope to hear yours. Whether you join the Pink Balloon tribe or work through this workbook, may you shape the path to a future filled with peace, love, and joy. You are worth it!

Without doing this inner excavation, it's easy to become stuck and confused, not feeling alignment or purpose, and perhaps blaming other people or situations for the problems we're experiencing. We need to uncover our limiting beliefs and internal blocks that sabotage our success. When it comes to experiencing happiness and abundance, we may settle for less than we deserve. Like many of us, I have been through significant transitions in my life and periods where I felt stuck, lost, and confused, both personally and professionally. I wanted a guide and searched for the support I needed to move my life into alignment. I took classes, hired coaches, read books, worked with healers, therapists, and advisors, and developed a patchwork of both traditional solutions and fresh ideas. I got clear about my goals and am now living them.

In combining financial well-being strategies, life coaching practices, and education methodology, Pink Balloon also offers facilitated opportunities to connect with other women who are undergoing similar challenges and transitions. Women love to learn together and support each other. If you already have a great tribe, you might want to gather your girlfriends gang to tackle this workbook together and lean on each other while undergoing your process of self-discovery and transformation.

# Eleven STEPS TO Bloom YOUR LIFE

An Inspirational Pink Balloon Lifestyle Guide to Rewrite Your Story

By Michelle Williams

## STEP 6: Let it go and dig deep

Big idea: Life is full of ups and downs, and it's easy to get stuck in a cycle of negativity. Letting go of old baggage and embracing new opportunities is key to living a happy and abundant life. Sometimes possessions are what you need to release if they're holding you back. If you're hanging onto pictures that remind you of negative times in your life, toss them. Are you keeping clothes in your closet that remind you of a bad relationship? Take them to a consignment store or donate them. What about those things that your grandma gave you when you were 14 years old that you've never worn? Get rid of them. They're cluttering your space and your mind. Letting go of old baggage is a journey that will likely include peaks and valleys. When it feels hard, remind yourself that letting go of what isn't serving you feels good. You are worth it. You are worth it. You are worth it.

Part of letting go is processing your emotions about any sense of loss you may feel for the positive elements of what you're releasing. The key is to accept all of how you feel, recognizing that you can feel sadness and euphoria for the same thing at different times (or even at the same time). Letting go doesn't necessarily mean you feel great right away. It's a journey that will likely include peaks and valleys. When it feels hard, remind yourself that letting go of what isn't serving you feels good. You are worth it. You are worth it. You are worth it.

## Create THE LIFE YOU WANT AND Bloom YOUR FUTURE

Through a diverse career as a tenured educator, wealth manager, and life coach, Pink Balloon is the uplifting result of my experiences, training, and research over the last 25 years. Bringing my teacher's heart to women's wealth and well-being, I became particularly interested in the intersection where peace and joy merge with female empowerment and lifestyle alignment. Pink Balloon is my spiritual purpose, and I created this role for myself as a Lifestyle Guide to support clients as they find the courage and the faith to change their lives for the better, and rise.
