

How to use the Solar at your property

Important information about your property

The solar installed at this property does not work like a traditional solar system. To access your solar energy you must be a Powershop customer.

This solar system is designed to share the solar benefits between the homeowner who uses it and Stoddart Group who paid for it.

Your property is equipped with a solar system, you have the option to purchase the power it produces at a discounted rate through Powershop.

Accessing the solar energy is as simple as signing up your regular electricity account with Powershop. Any power that you use that comes from the solar system will be charged at a lower rate on your monthly power bill.

You can switch to another electricity retailer at any time. However if you do switch to another electricity retailer, you will no longer have access to energy from the solar system.

For more information

Call Powershop on **1800 462 668** or go to **powershop.com.au/stoddart/homeowners** to setup an electricity account and start using the solar energy.

Find out more information about the solar system by going to:
