

Hosted. The future of VoIP.

The latest step forward in modern communications, Hosted removes the need for on-site routing hardware and offers vastly improved communication services for a fraction of the cost.

Developed and coded in the UK, our Hosted VoIP offers unrivalled unity with existing and local infrastructure.

It uses entirely Cloud-based technology, allowing high quality voice and data to be transmitted through a single Internet connection, rather than through the previous on-site PBX technology. This offers significant advantages to businesses.

ENDURANCE

By 2025, BT is transitioning all landlines to VoIP technology, meaning Hosted is an secure investment in the future of communications.

FLEXIBILITY

Hosted can be adapted for unique, complex solutions to your specific business needs, in a way that is impossible with traditional telephony.

MOBILITY

It can be used anywhere in the world, with little notice, perfect for remote workers or location changes.

PEACE OF MIND

Cloud-based technology can back up data in real-time for assurance and easy access.

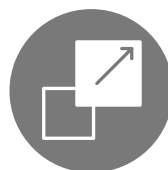

SECURITY

Internet connection allows for more secure voice and data transmission, through strong encryption.

COST SAVINGS

Seamlessly sending voice and data over the Internet, often using existing infrastructure, means businesses can reduce monthly expenses by up to 50%.

SCALABLE

Hosted can easily be adapted to grow with your changing business needs, without minimal need for internal phone management.
