Alberta, Yukon, Northwest Territories, Nunavut	**Rapidly Expanding**	Rapidly expanding market presence; aggressively looking for new retail opportunities and pharmacy partnerships.

3. Core Retail Banner & Group Compatibility

Maplewave Pharmacy POS is fully integrated into Canada's leading retail pharmacy banners and group buying networks, supporting banner-specific loyalty programs, price files, and operational standards:

- **Pharmasave Retail Network:** Maplewave is officially part of the Pharmasave retail network, delivering tailored point of sale and inventory features designed specifically for Pharmasave member locations.
- **PharmaChoice Retail Network:** Maplewave is part of the PharmaChoice retail network, offering seamless integration with PharmaChoice operational systems and banner loyalty setups.
- **Whole Health Retail Network:** Maplewave is part of the Wholehealth retail network, providing specialized tools for independent members under the Wholehealth banner.

4. Technical Integrations & Automation Capabilities

Maplewave's POS architecture connects front-shop retail management with core clinical pharmacy systems, electronic shelf labels, payment processors, and primary supply chain partners.

Kroll Pharmacy Management Integration

Includes full Kroll Integration and Kroll Pharmacy Management Integration. Real-time synchronicity between clinical prescription workflows, Rx Pickup validation, and front-shop till settlement ensures compliance and speeds up customer checkout.

McKesson Supply Chain Automation

Features comprehensive McKesson Inventory Automation, McKesson Web Service integration, one-click McKesson order generation, and one-click McKesson receiving for ultra-efficient supply chain throughput.

Moneris Payment Processing

Native Moneris debit/credit integration ensures fast, secure, PCI-compliant processing for chip, contactless, and card transactions.

Electronic Shelf Tag Integration

Includes Electronic Shelf Tag integration and Electronic Shelf Tags management to automate store-wide price updates, eliminating paper labels and reducing manual pricing errors.

5. Comprehensive POS Feature Set & System Specifications
