Profiles

https://story-story.ai/community/profile/72/stacks

The profile page for Yoonsun Lee, a Forward Design Engineer, features a navigation bar with 'Colleges', 'Community', 'Groups', '+ Create', 'Edit Profile', and 'Logout'. The profile includes a bio, a profile picture, and a grid of stacks: 'Getting Started' (2 cards), 'Games' (1 card), 'Workshop' (1 card), and 'Design in AI' (2 cards). A '+ New Stack' button is located at the bottom right of the stacks section. The footer contains 'story-story' and '© 2026'.

The 'Create Your Story Card' form includes fields for 'Card Title', 'Short Description', and 'Featured Image'. It also features a rich text editor for 'Write your story here...', a 'Drop files here or click to upload' section, and optional fields for 'Categories', 'Author Photo', 'Stack Name', 'Tags', and 'Card Order Number'. A 'Visibility' dropdown is set to 'Public - Anyone can see', and there is a checkbox for 'I agree to the Privacy Policy and Terms of Use'.

Develop Google Classroom apps and integrations

Use the Google Classroom API to programmatically manage Classroom resources or make your content accessible to students and teachers in Classroom.

- [API overview](#)
- [About Google Classroom](#)

Manage school resources

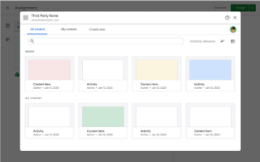

Automate rostering with the Classroom API. You can create, update, and delete courses, users, and guardians in Classroom.

- [Manage courses](#)
- [Manage users](#)
- [Manage guardians](#)

Add-ons: Your product in Classroom

Build a Classroom add-on to make your user experience seamlessly accessible to students and teachers in Classroom. Add-ons let teachers and students access your products directly from Classroom and at any point in their learning journey.

[Classroom add-ons overview](#)

Receive push notifications

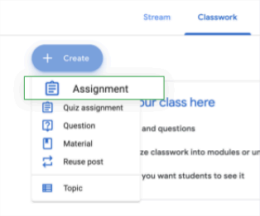

Keep your records up-to-date by subscribing to Pub/Sub notifications for changes to rosters and assignments.

[Subscribe to push notifications](#)

Easily connect users to your website

You can programmatically create and manage assignments that link to content on another website. Set assignment details, grades, and turn-in status using the CourseWork API, or easily enable teachers to push assignments from your website to Classroom with embedded Share to Classroom buttons.

- [Manage coursework and grades](#)
- [Share to Classroom](#)

Provider Types

The community marketplace connects independent providers with students and the local community.

- App Builders Software, SaaS, dev tools
- Tutors Teaching, coaching, mentoring
- Restaurants Food, drinks, delivery
- Classifieds Buy, sell, trade
- Services Professions, consulting

About

The community directory is for individuals and businesses not affiliated with a specific college – tutors, restaurants, AI software subscriptions, and other independent service providers. Set up a profile, create stacks with commerce cards, and sell subscriptions or one-time services.

```

Xano APIs

Auth	/login, signup, me, profile, reset
Stories	CRUD stories, paginate list
Community	published-profiles, files-upload
Groups	CRUD groups, members, invites
CMS	images, page-sections

Deploy Commands

```
npx wrangler deploy  
npm run deploy:cf
```

Authorization Flow

Browser (Auth Modal)

1. User enters email+password
2. POST /auth/login {email, password}
3. Receive {authToken: "JWE..."}
4. localStorage.setItem('xano_auth_token', JWE)
5. GET/auth/me (Bearer JWE)
6. Receive 28 user fields
7. localStorage.setItem('xano_user', JSON.stringify(user))
8. dispatch('xano.login') CSS visibility toggles fire

localStorage (persists across pages)

xano_auth_token	JWE string (5-part encrypted)
xano_user	JSON {id, email, first-name, ...28 fields}
xano_permissions	Permission object

JWE Token Characteristics

Format: A256KW / A256CBC-HS512 / DEF

5-part encrypted, NOT decodable client-side

Expires: ~1 hour (pre-flight/auth/me before forms)

*Google and Meta tokens refresh hourly

CSS Visibility System

.auth---visible	Shown when logged IN
.auth---invisible	Shown when logged OUT

Xano Auth API

POST /auth/login
Auth: None
Returns: {authToken: "JWE..."} only

GET /auth/me (ID 837)
Auth: table 87 (validates JWE)
Returns: 28 sanitized user fields

PATCH /auth/profile (ID 856)
Auth: table 87
Updates writable profile fields

POST /auth/oauth/google (ID 870)
Google ID token JWE

JS Files Reading Auth Token

- xano-auth-modal.js
- card-utils.js
- card-renderer.js
- card-share-modal.js
- community-profile.js
- dashboard-profile.js
- group-detail.js
- group-form.js
- group-invite.js
- stack-wizard.js
- stack-collaborator-manager.js
- story-form-stack-wizard.js
- profiles-flick-slider.js
- private-documents.js

HTML Data Attributes

data-auth-show="authenticated"
Show when logged in

data-auth-hide="authenticated"
Hide when logged in

data-role-visible="student"
Show for specific roles

data-user-name
Displays user full name

data-user-avatar
Sets src to profile image

Password Reset Flow

forgot-password:

1. Normalize email
2. Generate UUID
3. SHA-256 hash invites table
4. Email PLAIN UUID via Resent
5. Always return success

reset-password:

1. SHA-256 hash input token
2. Match invite (pending)
3. Check expiry (1 hour)
4. Update Password (auto-hash)

Google OAuth

POST/auth/oauth/google (ID 870)
Google ID token JWE auth token
Account linking via google_id field

API Dependency Map

Auth Group 57

POST /auth/login	email+pass (authToken)
POST /auth/signup	register (authToken)
GET /authme (837) fields	Bearer JWE 28
PATCH /auth/me (856)	Bearer JWE update
POST /auth/profile (856)	email send reset
POST /auth/reset-password (799)	token+pass reset
POST /auth/oauth/google (870)	Google token JWE
POST /auth/logout	invalidate session
POST /invites/create	auth invite record
POST /invites/validate	token validity

Stories API (Group 41)

GET /stories	paginated list (public)
POST /stories	create (auth required)
GET /stories/:id	single story
PATCH /stories/:id (733)	Partial update
DELETE /stories/:id	delete story

Community (Group 60)

GET /community/published-profiles
GET /community/profiles/me
POST /community/file-upload

Groups (Group 59)

GET /groups	list all
POST /groups	create
GET /groups/:id	detail
PUT /groups/:id	update
POST /groups/:id/join	join
GET /groups/:id/members	member list

Cloudflare Workers Edge APIs proxy Xano + sanitize

/edge/public-profiles	Xano community
?id=N ?slug=x ?college_id=N	
PUBLIC_FIELDS allowlist filter	
/edge/group-members	Xano groups + community
?group_id=N (JOIN + sanitize)	

Auth Endpoints / JS
