

## TRAC II 1030

### UTTO Universal Oil for Tractors

No. 621030

TRAC II 1030 is a semi-synthetic UTTO tractor multi-purpose oil for hydraulics, gearboxes and wet brakes/clutches. Can also be used in construction machinery where an UTTO oil is specified.

| Typical Values      |                    |       | Advantages                                                                                                                                         |
|---------------------|--------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Density at 15°C     | g/ml               | 0,860 | - no squeaking brakes<br>- excellent temperature behavior<br>- long oil changing intervals<br>- high wear protection<br>- high oxidation stability |
| CCS at -25 °C       | cP                 | 4700  |                                                                                                                                                    |
| Pourpoint           | °C                 | <-30  |                                                                                                                                                    |
| Viscosity at 40 °C  | mm <sup>2</sup> /s | 65    |                                                                                                                                                    |
| Viscosity at 100 °C | mm <sup>2</sup> /s | 10,5  |                                                                                                                                                    |
| Viscosity Index     |                    | 150   |                                                                                                                                                    |
