

PRODUCT INFORMATION

RM-5°C

Ready Mix -5°C

N°: 921005

Description:

RM-5°C a ready for use coolant, intended for the protection of cooling systems of motor vehicles/ Do not be diluted with water before use.

Application:

RM-5°C is suitable for use in open and closed cooling systems. It provides maximum protection from freezing up to -5 °C. in winter and from overheating in summer. It provides improved protection against corrosion of all metal parts,. It prevents formation of foam and deposits. It guarantees improved heat transfer, providing increased engine flexibility and maximum reliability to users.

Instruction for use:

The cooling system should be completely emptied, flushed and filled with a RM-5°C without dilution with water. Use at ambient temperatures down to minus -5 degrees Celsius.

Packages:

Different options are possible.
