

PRODUCT INFORMATION

CATALYTIC CONVERTER ADDITIVE

No. 943086

Product Description

Catalytic Converter Additive is highly effective in combating problems such as operational pollutants and increased emissions resulting from the frequent occurrence of hybrid vehicle combustion engines in the cold start phase due to irregular short-term operation.

Application:

Recommendation: Add to the fuel system at least 3-4 times a year before refueling, but at the latest during the next customer service.

Consumption

300 ml for 80 ltr. Fuel

Reaction time

While engine is running
