

PRODUCT INFORMATION

VALVES INJECTION

No. 943075

Product Description

Removes crust and coking from injection systems, cleans inlet valves and injection nozzles. Prevents rough running of the engine, power loss and start problems. Fuel consumption and exhaust gas emission will be reduced.

Application:

Add to the petrol system at least 3-4 times a year before refueling. In problematic cases use cleaning equipment.

Consumption

300 ml for 80 ltr. Petrol

Reaction time

While engine is running
