

BLYDE RIVER CANYON

Helicopter Scenic Flight

Our team at Last Word Kitara has partnered with Hope For Wildlife Helicopter Services (HFWHS) to bring an exciting dimension to your safari experience.

Embark on a thrilling scenic flight led by HFWHS's pilot-conservationist Jana Meyer, over the Klaserie Private Nature Reserve and across the Blyde River Canyon. The word blyde, loosely translated from Afrikaans to English, literally means 'joy'. Along the way, Jana, an accredited field guide, will share information with you about ongoing conservation initiatives and how the inhabitants of the diverse patchwork quilt beneath you fit together.

As you rise above the varied biomes, spotting animals roaming free below you, we are sure you will experience joy in its purest form. To flit over the basking fruit orchards and witness the elevation of the mighty Drakensberg Mountains before zooming headlong into the breathtaking canyon is a life-changing experience. The flight on the way back provides a heart-stopping moment, as the mountain (highveld) seems to drop out from underneath you, giving way to a jaw-droppingly beautiful panorama. Awestruck, you are reward-

ed with lesser-seen views of the Lowveld as far as the eye can see. Amazing!

The hour-long Blyde River Canyon helicopter flip is an exhilarating journey from the Lowveld bush to one of the largest canyons on Earth. The helicopter enters the spectacular canyon over the Blyde dam and joins the rare Cape Vultures in their airspace. This activity is truly a sensory overload and an unforgettable experience.

What could be better than arriving in style at your luxury safari hideaway? In addition to offering the Blyde River Canyon helicopter flip, HFWHS offers an unrivalled transport link to Last Word Kitara, our luxury sanctuary on safari. The Robbie 44 can carry three passengers maximum. The duration of the Nelspruit leg is approximately an hour, and the Hoedspruit leg, about fifteen minutes, one way.

A UNIQUE EXPERIENCE IN THE AFRICAN BUSH

KPNR K9 Unit

The use of working dogs (K9's) in support of wildlife protection endeavours is well recognized across the World.

Wildlife conservation dogs are deployed to perform two primary functions, firstly substance detection and secondly to track and pursue fugitives or criminal elements. These qualities are unique to highly trained and skilled K9/handler units and cannot be substituted by humans or other technology.

The KPNR K9 experience forms part of a fundraising initiative in support of the KPNR K9 Unit's sustainability, care and safety of our K9 dogs. It also demonstrates the important function of the K9

pack-units (dogs and handlers) within the security and conservation frameworks of the reserve.

This offers guests the unique opportunity to be part of the action during a K9 demonstration of the endangered species K9 detection or tracking pack-units, while detecting contraband substances or tracking down "suspects" while being part of our K9 tracking pack-unit.
