

FLAT GUARD MOUNTING LEGS

Easily install Flat Guards directly onto equipment or existing structures using custom Guard Mounting Legs. This versatile mounting option removes the need for additional support structures, streamlining installation. Designed to fit your specific application, mounting legs ensure obstructions don't interfere, offering a reliable and efficient solution for various applications.

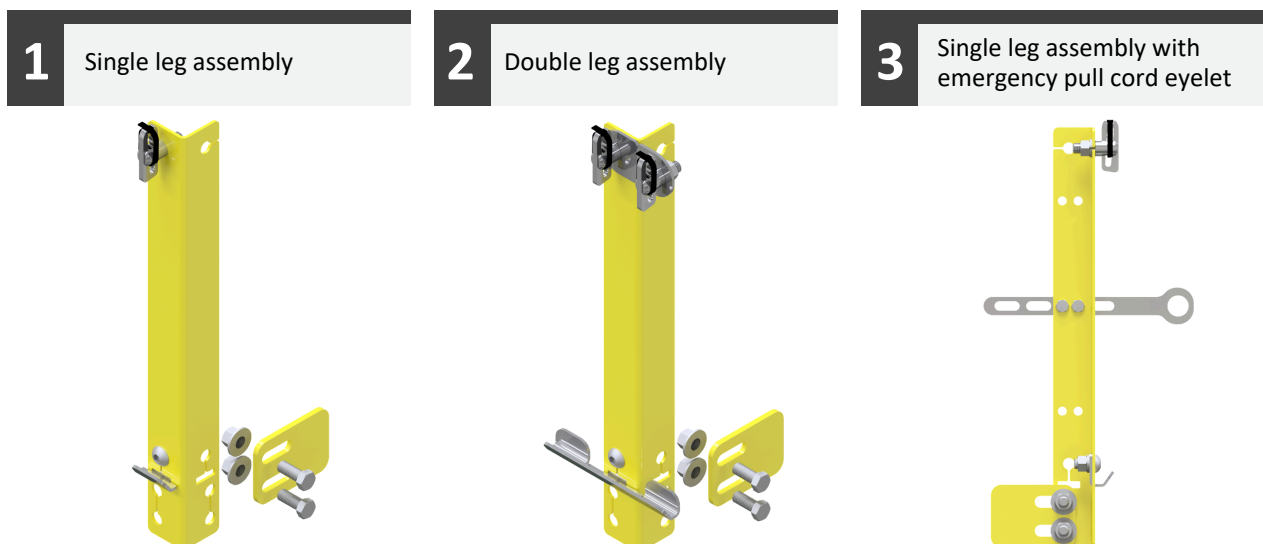

BUILT TO LAST

- › Heavy-duty steel construction
- › Powder coated for increased durability

GUARD MOUNTING LEG CONFIGURATIONS

- › **Horizontal Standoff:** Length is customized taking consideration of obstructions
- › **Vertical Standoff:** Ideal for mounting legs on “TOP” of structure
- › **Adjustable Standoff:** Multiple holes for maximum adjustability during installation

Please Note: Double leg assemblies are used for continuous runs of guards.
