

V-BELT GUARDS

V-Belt Guards protect workers from exposed pinch points and rotating hazards around belt and chain driven equipment, such as fans, blowers, compressors, crushers, conveyors, screeners and more. Fully enclosing rotating parts to ensure compliance with regulations and a safer work environment.

EASY TO INSTALL

- › No need to remove sheaves or sprockets during installation
- › Custom fit for each application
- › All Mounting hardware and legs or brackets are included for ease of installation
- › Available in various configurations to match equipment needs

EASY TO MAINTAIN

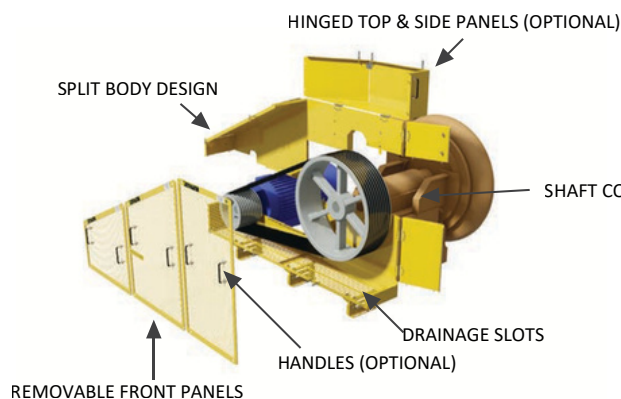

- › Bottom slots help reduce material build-up
- › Front guards can be easily removed to facilitate equipment maintenance
- › The enclosed design helps extend the life of belts and sheaves / chains and sprockets
- › Laser cut identification for easy equipment referencing

BUILT TO LAST

- › Heavy-duty steel construction
- › Also available in stainless steel, aluminum, or brass
- › Powder coated for increased visibility & durability

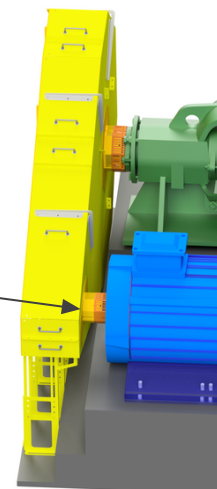

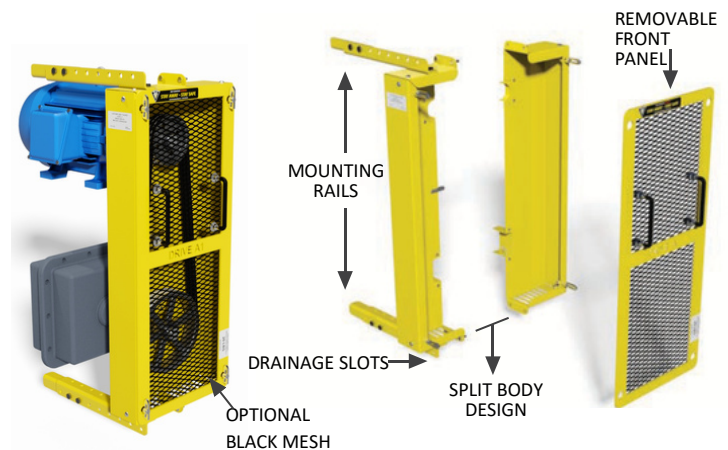

FEATURES AND OPTIONS

- › Optional Black Mesh: Improves visibility and allows for the use of touchless measuring devices
- › Optional Hinges and Handles: Improve ergonomics and accessibility
