Care & Maintenance:

Evostone is a waterproof, hygienic and easy to clean surface. The Evostone surface is a satin finish which has a slight reflective shine, and like most materials requires some care and maintenance to keep performing and looking as good as the day it was installed. To do this, its starts with prevention.

Prevention:

Simple steps can be taken to help keep Evostone looking amazing. The following guidelines outline some steps to achieve this:

- Never stand or place heavy objects or machinery on solid surface products.
- Use felt protectors under pottery or other hard standing objects, refrain from sliding hard or heavy objects across the surface.
- Avoid leaving hot appliances or utensils in direct contact with solid surface products
- Avoid the use of strong chemicals such as strong acid, paint removers, cleansers etc. In case of contact, rinse the surface with water immediately.
- Do not cut or score directly on the bench top.

- Avoid using abrasive scouring pads for routine cleaning.
- When cleaning, towel dry to prevent watermarks.

Stains & Light Scratches:

Scuff marks are removed by daily cleaning. For persistent stains and light scratches which require a more thorough clean to remove use a mild abrasive cleanser and wipe down in a circular motion. After, rinse and wipe surface with a damp non scratch cloth.

Revitalising Surface:

Over years of use and enjoying the benefits of Evostone product it may require a face lift. The surface can be completely restored to look like brand new again without the price of replacing.

A unique, innovative & versatile 20mm benchtop solution.

Waterproof  
& non-porous.

Easy to cut/fabricate  
on site & install.

Safe fabrication -  
contains no silica.

Durable.
