WORK EXPERIENCE

2019 **Jennifer Brooks**

Blue Can Water & BluWave

For Jennifer Brooks, The Vice President of Marketing for the Blue Can company, the main task was to point out the current issues with the product and come up with mockups to showcase the improvements and explain how they will improve the product in the long run. After creating the mock ups I created a PowerPoint and gave a professional presentation to Jennifer Brooks.

2019 **New Line Cinema & Amazon Studios**

Concept Intern

I got in contact with Christine, and she wanted me to create any kind of promotional pieces for the upcoming movies at the time: IT Chapter Two and The GoldFinch. The direction of each promo is different, for It Chapter Two I created a social media GIF showcasing Pennywise asking the audience if they wanted a balloon. He would fade into the background and all you see last is his glowing yellow eyes. As for The Goldfinch, I created a movie poster showing the painting and a tear. The tear would reveal the final moments the main character spent with his mother.

EDUCATION

2014- **California State University Los Angeles**

2020 *Bachelor's of Art*

Option: Graphic Design/Visual Communication

Learning programs including Adobe Photoshop to InDesign, being able to create responsive web pages as well as hosting them, creating logos etc.

OBJECTIVE

Whether it's creating awesome graphics to dissecting how websites work, I'm always striving to learn new skills. Some of my best designs were heavily influenced by heavy metal music, which shows my passion for the music genre. I hope to one day work for a video game company like Naughty Dog Studios, I had the opportunity to playtest for them and their studio overall was breathtaking. I've met many designers who hated coding and I'm the exact opposite, sure I get mad when I don't understand something but I strive to learn it. Seeing lines of code can be very exhausting but collecting quarters has helped me keep my sanity as my collection keeps on growing. I am ready to tackle anything you throw at me, and if I struggle I am always willing to learn something new.
