

## Automatic Purge Valve (APV) – Updated Faceplate Design Notice

Rusco is pleased to announce a minor visual update to our Automatic Ball Valve – APV Series product line.

Moving forward, all models of the APV (1/2-APV, 3/4-APV & 1-APV) will feature a newly designed front faceplate showcasing updated Rusco branding and product labeling. This change is strictly cosmetic and is intended to better align the product appearance with our current brand identity.

Please note:

- The APV's functionality, operation, and performance remain completely unchanged
- Product specifications and installation requirements are unchanged
- Existing model numbers remain the same unless otherwise communicated
- Customers can expect the same reliability and performance they are accustomed to from the APV

This update will begin appearing on production units starting in June 2026.

If you have any questions regarding this change or would like more information on the APV Series, please contact the Rusco team at 1-800-345-1033 or email [customerservice@rusco.com](mailto:customerservice@rusco.com).

Thank you for your continued support of Rusco of Brooksville, LLC.  
Chris Welch, Product Manager
