Purpose: Approve loan for roof repair

Find details in your recent E-News or in the brochure rack

What are the issues with the current roof and what is the urgency in repairing it?

If you have walked through the second floor of the East Wing (FFN classroom area) you may have seen the ceiling tiles pulled back and buckets to catch the rainwater leaking through the roof. The stop gap fixes that have been addressed over the last few years are no longer effective and that area (section 5 of the roof) has deteriorated to the point that it now requires immediate replacement.

Assessment of the entire roof was conducted and confirmed that Section 5 is the only section that needs to be replaced now. All other sections are in satisfactory condition at this time but should continue to be monitored.

How was the roof replacement plan and cost determined?

A Task Force, working with the Facilities Team, was put together to define the scope of work, get an estimate of the cost, and recommend a contractor. We are confident, that this team with other mission partners helping out, have put together the right plan for addressing the roofing issues. Key factors in the process were:

- Hiring a consultant with expertise in the field to help guide us through the process including helping with the roof assessment, evaluating the construction criteria and evaluating the quotes.
- Assessing the condition of the roof and determining what part needed replacement.
- Researching and evaluating the different options for replacing the roof, such as the different membranes, installation processes, insulation options and warranties.
- Seven contractors came onsite to inspect the roof and prepare a plan and cost estimate for replacing the roof.
- Bids were reviewed and evaluated, reducing the field to three top contenders, leading to the final selection.

When will the roof repair project begin and who will be doing it?

We are in the final steps of selecting the contractor and working on establishing a start date. The project will begin and end yet this fall.

What is the plan for paying for the roofing project?

Because of the urgency to get the roof repaired, New Heights Church will initially secure a loan to cover the cost of the roof repair. We have received pre-approval for securing a loan through Mission Investment Fund (MIF). During the first year, estimated cost for New Heights is \$14,344 and has been incorporated into the 2027 budget plan.

Next year, The Grove Board of Directors will kick off a community engagement campaign to create awareness and support for the community center. They will initiate a community wide capital campaign to raise funds for improvement projects where some of the funds would be used to pay off or assume the roofing loan.

What is the purpose of the congregational meeting?

The purpose of the congregational meeting on October 4 is to gain approval to secure a loan up to \$175,000 with Mission Investment Fund (MIF) for the roof repair project. Congregational approval is needed to secure the loan which then allows us to finalize plans with the contractor to begin the construction project.
