

SUPERCARGE YOUR WATER INFRASTRUCTURE

Rugged Connect™ is purpose-built for remote monitoring, automation, and management of water and wastewater infrastructure.

Designed for municipalities, rural systems, agriculture, and commercial water operators, Rugged Connect puts powerful, secure control at your fingertips:

- **Robust Telemetry Platform:** Seamless integration with new or legacy SCADA systems—no rip and replace needed.
- **Industry-Agnostic Connectivity:** Wireless, hybrid LTE, and satellite communications mean you never lose visibility—wherever your assets operate.
- **Flexible Deployment:** Tank sites, reservoirs, lift stations, or treatment facilities—install Rugged Connect and capture instant value.
- **Durable. Reliable. Always On:** Field-proven for tough conditions and long-term, low-maintenance operation.

INTELLIGENT SCADA CONTROLLER FOR WATER TANKS

Take control with CiQ.400 & 420 – engineered for reliability, simplicity, and complete visibility and control. Perfect for tank sites with remote pump stations that demand robust monitoring and control with easy, intuitive operation.

- Enhanced Touchscreen UI: 7" PLC interface makes set-up, operations, and troubleshooting a breeze.
- Flexible IO Architecture: four or eight analog sensor inputs, ten digital inputs, eight relay outputs, two digital NPNs, and two analog outputs
- Resilient Enclosure: 14" x 12" x 6" polycarbonate box or stainless steel, designed for water industry environments.
- Scalable Communications: Choose satellite or hybrid (LTE/satellite) comms for uninterrupted data.
- Designed for Operators: Built for the unique needs of water managers—simple to deploy, easy to maintain, powerful results.

WHY INDUSTRY LEADERS TRUST RUGGED TELEMETRY

Designed for Water Pros: Meets stringent industry standards for accuracy, reliability, and reporting.

Protects Investments: Multi-year service life and lower cost of ownership—backed by rugged hardware and superior engineering.

Seamless Integration: Works independently or alongside existing infrastructure; proven in both large utilities and rural communities.

Expert Support: Rugged Telemetry provides dedicated consultation to help you select, install, and optimize every solution.
