Rocket Close

Protect your funds from wire fraud

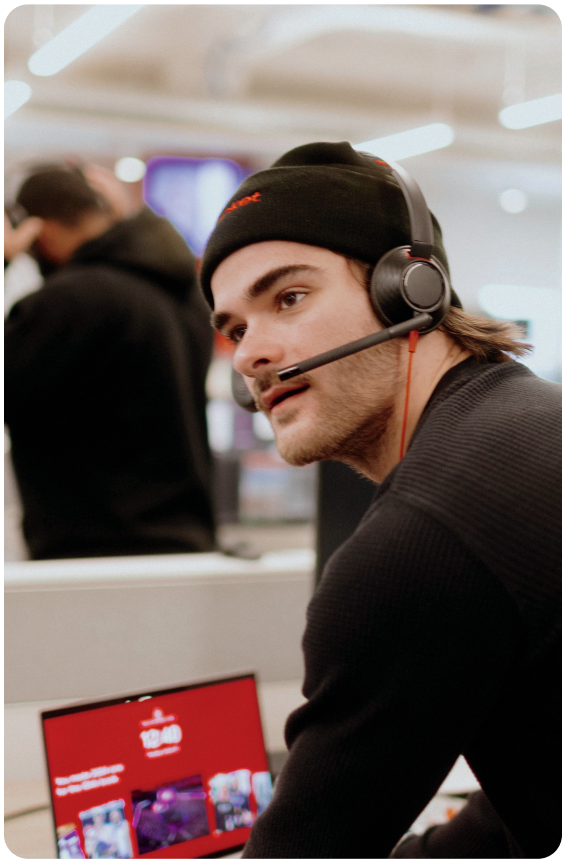

Wire fraud is real, and scammers are getting smarter. They use fake emails and last-minute payment changes to redirect your money. But here's the good news: you're in control, and we can help you stay safe.

Steps to Protect Your Funds from Wire Fraud.

Here's how to keep your money safe:

1. **Verify wire instructions the right way.** Call us directly or check Rocket Close website for payment details. Never use contact information from an email – scammers can fake those.
2. **Watch for red flags.** Be suspicious of sudden changes to wire instructions, especially if someone's pushing for urgency or asking you to keep it quiet. Trust your gut.
3. **Double-check the details.** Before you send anything, verify:
   - The recipient's name matches what you expect
   - Account and routing numbers are correct
4. **Keep financial information off email.** Real professionals won't ask for sensitive details via email. If you need to share financial information, do it in person, over the phone, or via our secure portal.
5. **Take your time.** If something feels off, pause and investigate using a phone number you trust. A few minutes of verification could prevent thousands in losses.

Any time you're asked to transfer funds electronically, stay alert.

Protecting your funds from wire fraud is critical during the closing process. Fraudsters are becoming increasingly sophisticated, often using convincing emails or last-minute changes to payment instructions in an attempt to redirect your money. By staying vigilant, verifying instructions through trusted channels, and following established security practices, you can help ensure your funds are transferred safely and securely.
