

## How To Edit LinkedIn Background Photo

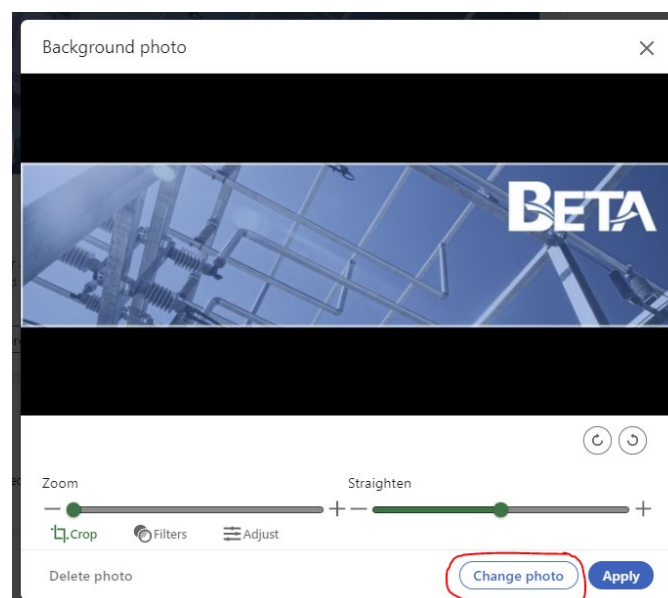

1. Go to your LinkedIn profile page.
2. Click the pencil icon in the upper right corner of your background image, circled in red below.

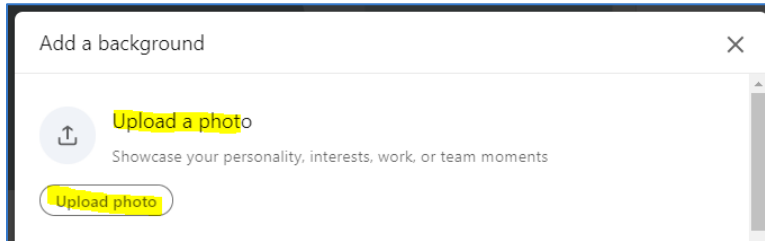

Note: If you don't have a photo background yet, then the icon will be a camera instead of a pencil (see screenshot below).

3. To replace an existing photo, select "Change photo."

Note: If you're adding a background photo for the first time, the options will look a little different. An upload window will appear. Select "Upload a photo."

4. Upload the "Beta LinkedIn Background.png" file and click "Apply."
