

Traffic Management

K&A provides innovative traffic engineering solutions for private and public sector clients to improve highway safety, maintain traffic through construction sites, and coordinate with the impact of proposed developments. We conduct safety studies and prepare transportation management plans.

Transportation Department:

K&A Transportation Department will assist clients with approvals and permits for their projects. We are experienced with the implementation of local and state agencies standards, including MUTCD and Public rights-of-ways Accessibility Guidelines.

Specific Services:

- Traffic Impact Studies
- Corridor Studies
- Capacity Analyses
- Route Signing
- Pavement Markings
- Highway & Pedestrian Lighting
- Signalization

Traffic Studies
