

K&A Nepal

In 2019, K&A expanded internationally to Kathmandu, Nepal creating opportunities for cost and time savings while maintaining the same high-quality standards that our clients expect. Currently, K&A Nepal is providing 3rd party support to several major Utilities in the Northeast.

Client Experience:

K&A U.S. remains the main point of contact for all clients and is available to support all day-to-day needs. The U.S. team works directly with K&A Nepal to deliver solutions at a lower cost with increased speed. U.S. SMEs review all deliverables prior to submission.

Primary Service Offerings:

- Power Transmission Planning
- Drafting & Design
- Project Controls
- Operations (IT, HR and Talent Acquisition)

Cyber Security:

U.S. Hosting

U.S.-based infrastructure and data management

\$10M Coverage

Cyber security insurance protection

Cyber Protection

Enterprise-grade cybersecurity controls

Benefits of Working with K&A Nepal:

Cost Savings

By leveraging K&A Nepal, our clients often realize savings about 30%

Efficiency

The time difference between the United States and Nepal creates the opportunity for a 24/7 work environment. Our U.S. offices work closely with Nepal to complete projects in half the time.

Quality

Our K&A Nepal team is integral to our Support Services group. They receive the same training and professional development opportunities.

U.S. based Subject Matter Experts provide quality control to ensure that all deliverables meet our high standards.
