

ADVANCED SUPPLIER MANAGEMENT

Comprehensive transport regulations result in an increasing data volume. Efficient document and data management becomes essential. Artificial Intelligence can automatize this process by extracting logistics-related data to facilitate planning.

MAKING CHANGE HAPPEN

SAIFTY is a platform combining AI with Cloud. Its integratability into other IT-Systems enables merger and contextualization of different data structures. This way, logistics data is available at any time.

EU-CIRCULAR ECONOMY ACTION PLAN

MAJOR GOALS

Product Composition
Transparency

Circular Economy

Reduction of
Environmental Footprint

DIGITAL PRODUCT PASSPORTS

COAC SAIFTY-AI FOR COMPLIANCE & MARKETABILITY

STRUCTURE SAFETY DOCUMENTS

Save extracted safety information and integrate into an ERP system supported by the SAIFTY Cloud. Templates help to create product passports and reports adjusted to country, region, or language.

Scan safety-related
documents with SAIFTY-Scan

SAIFTY-ROBOTS extracts
all relevant information

SAIFTY-Cloud saves files
structured and anytime available

ENSURE AVAILABILITY OF LOGISTICS DATA

The SAIFTY-Cloud serves as a central accesspoint for all relevant documents. The integrated Q&A function facilitates search providing a userfriendly low-code environment. Often accessed files are retrievable per one-click.
