

Description of Units

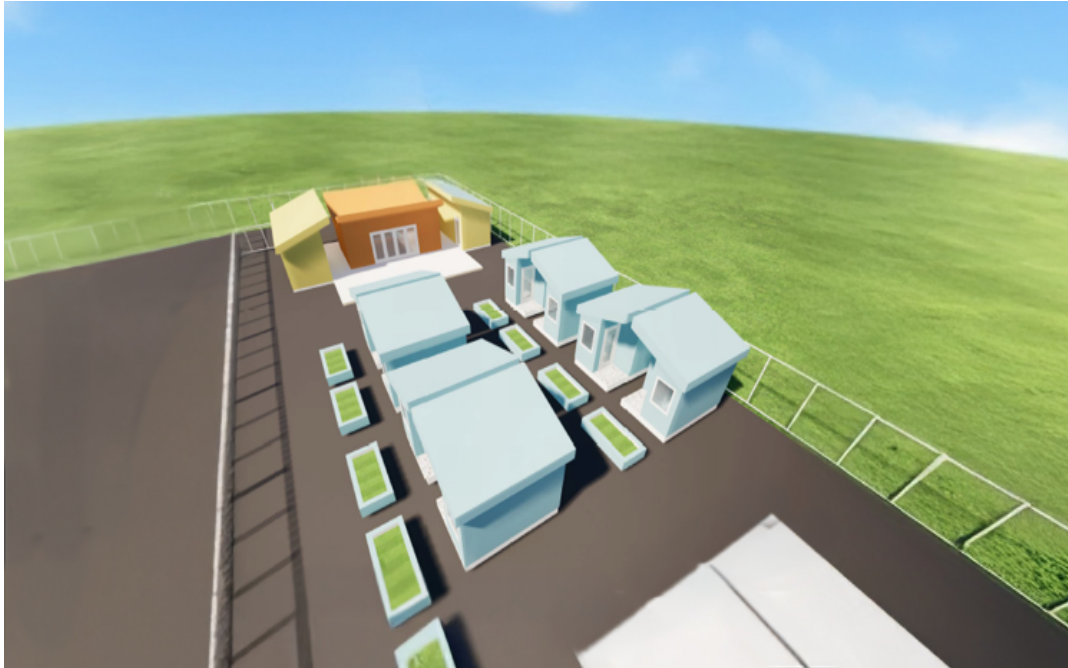

This pilot project, located on the Tudor + Elmore MOA campus, introduces small, efficient living units designed for single occupancy. Each unit is approximately 100 square feet, offering year-round habitation in a safe and secure environment that meets health and safety standards. The modular units are constructed off-site for quality control and rapid delivery, ensuring quick installation and flexibility for relocation. Each unit includes essential features such as a bed, storage, a small fridge, microwave, egress window, and ventilation, making them practical, comfortable, and sustainable solutions for housing needs.
