STATS IN PERU

MANAGING THE BOX

He controls the whole box.
He understands when to step up to cut a pass in behind the defenders. He avoids crosses by intercepting them on the ground or in the air.

FOOTWORK

He is a goalkeeper who is constantly used to build-up from the back. Sometimes he overused due to his good footwork. His defenders know about his quality, so they occasionally send the ball back to try to re-build the play.

Tactical analysis

LONG PASS RANGE

His long pass range is accurate both at goal kicks and open play. He has a great passing technique, which makes the ball drive flat. It is easier for his teammates to make an oriented control and harder for the rival to anticipate.

PLAYING AS A SWEEPER

He is an active goalkeeper when the play is being carried out near his box on and off the ball. He avoids well any possible second ball in behind the defenders. He plays up to anticipate through the line passes..
