# STATS IN PERU

## BALL CARRIES

He carries the ball on long dribbling runs to both drive forward/gain territory and win free-kicks/draw fouls and drag defenders out of position. Thanks to his skillset and creativity, these surging runs create attacking dynamism and change the tempo in the final third.

# Tactical analysis

## BOX-TO-BOX

He is a box-to-box midfielder who is effective in all phases. He drops deep to regain possession (or win the ball back) or bolster the defense and pushes forward to create a numerical advantage and build up play. He has an unyielding work rate

## OFFENSIVE 1V1

He is technically well-equipped to take defenders on in offensive 1v1 duels. He frequently uses shimmies and body feints to shake off his marker, and possesses sharp close-quarters dribbling that allows him to win free-kicks. Furthermore, he has excellent ball retention and is great at shielding the ball

## LINK-UP PLAY

He actively seeks the ball and shows for the pass to get involved in the build-up play, usually through close-range link-up with nearby teammates. When playing out from the back, he takes the initiative to be the primary outlet and the starting point for the move.
