## COVERAGES

He is a footballer with anticipation technique, mostly in direct play. He holds the rival's striker until the last second and then tries to recover the ball. He tries it quick, looking for an oriented deflection to build-up from the back.

## VISION OF PLAY

He makes great through balls. When transitioning into attack, he knows how to distribute the play. He has the ability to distribute the play on different zones of the pitch, both while building-up and up front.

## Tactical analysis

## DIRECT PLAY

Being a technical player, he knows how to generate breaking-line passes and drive the ball forward. He surpasses rivals through his passes and driving actions. He is capable of breaking-lines with short and long passes.

## POLYVALENCE

He is polivalent to cover many positions. He can feature as a centre-back or fullback on both flanks. He is adaptable to positional or direct play ideas, regardless his position on the pitch.

**Federico Pereira** vs Puebla.

Defensivamente muy bueno. Fue el jugador de **Toluca** con más duelos ganados [8], más entradas realizadas [4] y más intercepciones [4].

Clave en inicio de juego con esos envíos hacia intervalos y aceleraciones.
