

## Autobiography Examples for 6-Graders

### 1. Autobiography of a Tree

I am a Peach Tree. I was born from a tiny seed years ago and turned into a tall and strong tree located in a tranquil garden. My branches are generously covered with leaves most of the time. Once a year, I blossom and get covered with beautiful clusters of pinkish flowers that fill the air with sweet, floral fragrance. And then I treat people with delicious peaches. Throughout the years, I've seen many seasons pass by, watched children play around me, and given harvest every time. I continue growing and staying strong to provide more fruit every year.

### 2. Autobiography of a School Desk

Hi! I'm a wooden desk located in the middle school classroom, you can call me Desk. I've been in school for over a decade, helping young students learn. I help them by holding their textbooks, notebooks, and other school supplies during classes. On other days, I might help students hold their lunch boxes, snacks, and drinks during lunch breaks. Although I can't move, I'm here to create the perfect environment to let students focus on their lessons. During my time here, I've already seen and accommodated many students, and I will stay here to help more students get their education.

### 3. Autobiography of a Bicycle

Hi, I am a bicycle and you can call me Bike. I was created in a small factory and given as a gift to a small girl, Emma. Since that time, I've discovered many adventurous roads, taking Emma to parks, woods, and even school. I love many things about being a bicycle, such as the feeling of freedom and the wind on my wheels, the happiness of conquering a steep hill, and the ease of going down the street at full speed. I also love my adventure companion Emma, who never forgets to change my tires and keep me ready for our next trip.
