Work Experience

Senior UX Designer 01/2025-11/2025
Dscout | Remote

- Led end-to-end designs for the Respondent integration, expanding participant reach and improving recruitment efficiency for niche and hard to reach audiences by 40%, directly enhancing research diversity and speed.
- Drove visionary design research to define next-generation participant experiences and influence product strategy.
- Delivered cohesive mobile designs for iOS and Android, ensuring accessibility and consistency across platforms.

Product Designer 10/2021-12/2024
Cint | Remote

- Collaborated cross-functionally through the design process for consumer-facing and SaaS products to deliver pixel-perfect product designs, enhancing user engagement.
- Facilitated workshops and sprints to craft product visions, driving alignment on strategic and business goals.
- Conducted in-depth user research using Maze, Amplitude, and Dovetail to collect insights, validating designs and guiding metric driven improvements.
- Used CSAT scores and usage data to prioritize feature updates, increasing positive user experience.
- Presented strategic product design solutions to the company, stakeholders and leadership to articulate their business and customer impact as part of the larger company vision.
- Partnered closely with product managers and engineering teams to plan, prioritize and deliver on roadmaps that drove both customer satisfaction and company revenue.

UX Design Intern 06/2021-08/2021
IHS Markit | Boulder, CO

- Synthesized complex financial data to design accessible data visualizations improving user comprehension.
- Observed and analyzed 24 hours of usability testing sessions leading to high-quality, user driven iterations.
- Collaborated with clients and financial advisors to address complex financial designs, aligning solutions with compliance and user needs.

UX/UI Intern 02/2021-06/2021
Chosn | Remote

- Conducted extensive discovery research interviews to establish product vision and user requirements.
- Designed the onboarding experience, dashboard, and enhanced main features, raising \$25,000 from investors.
- Worked in an agile environment collaborating with front- and back-end developers to deliver new features.
