

REAPER MAX

COMPOSITE BRIDGE PLUG

WHY REAPER?

The Reaper MAX Bridge Plug has been engineered to deliver complete and dependable isolation from surface and below. Our innovative and field-proven slip design coupled with our fully composite build has led to the new industry standard in Bridge Plug performance. The Reaper MAX Bridge Plug has no equal when it comes to well control needs.

INNOVATIONS

PERFORMANCE

- **PRESSURE** — **10K** Differential Pressure rating from above and below
- Suitable for **>10k** casing test operations
- **OAL** of <21.5"
- Ultimate reliability and isolation

SLIP DESIGN

- Segmented slip design improves casing grip to help prevent slipping and allows precise activation
- Anti-preset feature to allow for improved run-in speeds

DRILL OUT

- Effortless drill outs
- Integrated interlocking clutch system prevents rotation

MATERIAL

- Fully Composite design, Zirconia buttons

OPTIONAL

- Significant fluid savings with available PDR (pump down ring)
