

**INTELLIGENTLY
VISUALIZING**
THE BUILT WORLD

GPRS SERVICES

- UTILITY LOCATING
- VIDEO PIPE INSPECTION
- LEAK DETECTION
- MAPPING & MODELING
- CONCRETE IMAGING
- 3D LASER SCANNING

SAFETY
ALWAYS ON
OUR RADAR

When you make safety #1, you stay on time, on task, and on budget. Accurate as built's keep everyone safer from start to finish

IN PURSUIT OF **100%**
SUBSURFACE
DAMAGE
PREVENTION

Join us in pursuit of 100% subsurface damage prevention; our current accuracy rate is 99.8%

BUILD
AT THE SPEED
OF **INSIGHT**

Collaborate with a single source of truth for an accurate, secure, and shareable flow of information to intelligently visualize your world, today and tomorrow

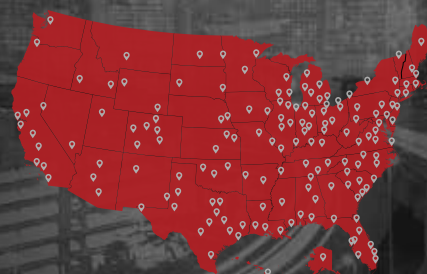

PUT YOUR PROJECT
**ON THE
MAP**

Ensure your "As-Built Accuracy" for precise project management, from pre-planning through operation & maintenance, via GPRS maps & models

LET'S GET TO WORK SCHEDULE A PROJECT

NATIONWIDE COVERAGE

GPRS has an unmatched nationwide service network making it easy to find an expert Project Manager in your area. Please contact your local GPRS Project Manager for information, pricing, and scheduling.

- ✓ TRAINING
- ✓ EQUIPMENT
- ✓ METHODOLOGY

The use of proper training, multiple technologies, and a field-tested methodology are the key to a successful concrete scan. Our Project Managers have mastered all three components through the utilization of the SIM Certification.

**NATIONWIDE ROLLOUT
PROJECTS?**

NATIONWIDE ROLLOUT PROJECTS?

GPRS IS HERE TO HELP.

CURBSIDE PICKUPS AND DRIVE-THROUGH EXPANSIONS

As grocers and other retailers expand their capabilities as it relates to curbside pick-up, more stations, signs, and pedestals must be placed along curbs and in parking lots. Without a private utility locate during the installation process, there's a risk of underground utility strikes ■

TENANT IMPROVEMENT AND MAINTENANCE

With the rise of e-commerce in the ever-changing retail space, contractors and owners are tasked with the re-purposing of vacant box stores and offices in strip malls. GPRS can provide critical information regarding the subsurface such as location of utilities, reinforcements, and USTs ■

NEW CONSTRUCTION RETAIL ROLLOUTS

When relocating cash wraps, launching new products, and remodeling a store, the need to cut or core concrete slabs presents a safety risk. Saw cutting and coring into an electrical conduit not only presents risk for the operator and nearby workers, but also risks shutting down the site or nearby sites ■

EFFICIENCY UPGRADES

With customer service being a central focus for retailers and restaurants upgrades are often made to increase efficiency and reduce wait time. When adding canopies, drive-through lanes, or self checkout kiosks, excavation must occur. A comprehensive private utility locate is a must in order to mitigate risk ■

SERVICES

UTILITY LOCATING

Our utility locating services designate the horizontal and vertical position of buried utility lines and other infrastructure on public and private property.

VIDEO PIPE INSPECTION

CCTV inspections give detailed pipe location and condition information. Our reports detail each pipe by segment.

LEAK DETECTION

Routine water loss surveys and leak detection complement our locating services to reduce instances of non-revenue water.

CONCRETE IMAGING

Our technologies are able to scan large areas and compile a detailed drawing or sketch that shows the safest path for future penetrations.

MAPPING & MODELING

Our Deliverables Team can create satellite image overlays, 3D models, CAD drawings, and even aerial drone imagery.

3D LASER SCANNING

Provide your team with precise as-built data and models for reliable project planning to reduce the risk of change orders and project delays.
