About me

A **digital Product Designer**, with a holistic approach, and around **6 years** of experience in **Ux/UI** and **Product Design**. I collaborate with different teams to help simplify complex design problems, always focusing on accessibility and user-centered design.

Experience

Teltonika Telematics | UX/UI Designer
Vilnius, Lithuania | April 2022 - June 2025

- **Process improvement and design advocacy** - established design workflows to ensure efficiency and clarity. Educated stakeholders on the process and impact of user experience, helping bring informed decision-making to the forefront.
- **Design system creation and maintenance** - with other Product designers, helped create and maintain the company design system, ensuring faster and easier collaboration between design and development, while keeping consistency across different products.
- **Start-to-finish design of TachoSync** - alongside the Product Owner, helped lead the design and development process of the companies Tachograph software solution.
 - Approached the product with a “big picture” mindset, helped define the problem and solutions from a full product perspective, rather than “design-only”.
 - Conducted market and user research, user interviews and testing. Designed low/high-fidelity wireframes, working closely with different departments.
 - Collaborated with different stakeholders, and participated in both product launch and post-launch research.
- **Full re-design of TCT** - collaborated with other Product designers in re-design of the telematics device editing software.
 - Primarily worked on the tutorial and onboarding process within the software, focusing on first-time users.
 - Helped prepare a responsive design of the desktop software, which allowed a fast and easy transition to a web-based software, ensuring usability on all screen sizes.
- **Cybersecurity feature creation and improvement** - Worked on design and implementation of various cybersecurity features.
- **Design of various internal systems**

Toptal | User Interface Designer
Galway, Ireland | May 2021 - January 2022

- **Freelance work with startups** - worked with startups like Helpjuice, on UX/UI design for both software and web pages.
- **User research and user testing** - conducted both large-scale user research with surveys, as well as 1-on-1 user interviews and user testing.

- **Designing for different platforms: WEB, iOS and Android.**
 - **Creating prototypes, wireframes and final UI.**
-

UniCredit | User Experience Designer (internship and full time work)

Mostar, Bosnia and Herzegovina | August 2019 - April 2021

- **Offered the position after re-designing the m-ba mobile app** - after several failed job applications, took the initiative by conducting user research, surveys and re-designing the mobile banking app m-ba.
 - **Improving the UX/UI on the transaction stage** - helped come up with design solutions, focusing on the transaction stage of the m-ba app, on both iOS and Android software.
 - **Maintained the company design system** - with other designers, worked on maintaining the design system, creating and updating components, and collaborating with development teams.
-

Education

College Logos Centar | Graphic Design - Bachelor's Degree

Mostar, Bosnia and Herzegovina | 2015 - 2021

Accademia di Belle Arti Santa Giulia | Graphic Design - Exchange student

Brescia, Italy | 2013 - 2014
