

Dear Valued Distribution Partners,

Arlington Scientific is fully committed to RPR testing. We recognize the continued transition to **IVDR** (In Vitro Diagnostic Medical Devices Regulation) in the European and UK markets and want to address what this means for our partners while reaffirming our commitment to achieving IVDR compliance.

Our regulatory team continues to advance the work required to bring our applicable RPR products into compliance with IVDR. As regulatory milestones and timelines are confirmed, we will share updates, including any implications for product availability or distributor requirements.

**We are fully vested in RPR testing, advancing IVDR compliance, and supporting our European and UK partners who bring our products to the laboratories that depend on them.**

If you have any questions throughout this IVDR transition, please contact me directly.  
Thank you for your continued trust and partnership.

Sincerely,

Daniel Vincent  
Global Director of Distribution  
Arlington Scientific, Inc.
