

North Country Wind Franklin and Clinton County, New York

NOTICE OF AMENDMENT TO APPLICATION

NY North Country, LLC (North Country), a wholly-owned subsidiary of Terra-Gen, LLC, is proposing to construct the North Country Wind Facility, a 360-megawatt (MW) wind-powered electric generating facility proposed to be located in the Towns of Belmont, Burke, and Chateaugay in Franklin County, and the Town of Clinton in Clinton County, New York (the “Facility”). This notice announces that on or about July 17, 2026, North Country intends to file an Amendment with the Office of Renewable Energy Siting and Electric Transmission (“ORES” or the “Office”), pursuant to 16 NYCRR 1100-11.1(e).

On February 13, 2026, the Applicant submitted an Application to ORES under Article VIII of the New York State Public Service Law (Article VIII). Since the submittal of the Article VIII Application, the Applicant has made several modifications to the Facility layout to optimize the design, reduce impacts to environmental resources, and address comments received. These modifications include adding the Nordex N163-5.X and 4.8 MW turbine models for consideration, increasing the maximum nameplate capacity of the Facility from 360 MW to 384.8 MW, relocating a laydown yard, making minor revisions to the collection line routing, including extending horizontal directional drilling to further reduce impacts to state-regulated wetlands and adjacent areas, shifting a permanent access road to minimize impacts to agricultural fields, making minor modifications to intersection improvements and blade swing areas, and making minor adjustments to the limits of disturbance to optimize the layout for construction and operation of the Facility.

All updated application materials remain subject to the ORES review and subsequent determination of completeness in compliance with Public Service Law Article VIII and 16 NYCRR part 1100. The Applicant is proposing to file a Supplement and Amended Application on or about July 17, 2026, addressing this Amendment, including revisions to various Exhibits of the Permit Application, along with additional information proposed by the Applicant to address the Office’s Notice of Incomplete Application dated April 14, 2026.

For more information about the Project, please visit the Project website at <https://www.northcountrynywindproject.com/>, on the ORES website (<https://dps.ny.gov/ores-permit-applications>) under ORES Matter No. 23-02973) or contact North Country at:
