Destination Page

Checkout Page

Confirmation Page

## High Level Requirement

- Homepage that assists users to browse destinations, read articles, understand how Zeit works, and see testimonials
- Search results page that shows cards relating to the query with detailed filters
- Category page that shows cards that fit under the aforementioned category with detailed filters
- Destination page that includes all the relevant information for a traveler to book their trip
- Checkout page that allows users to fill out their information and checkout using their choice of payment
- Confirmation page that reports trip details and helps users with next steps

## Detailed Requirements

## Homepage

- Navigation bar with hover dropdown buttons like explore, which will display a megamenu of categories and subcategories
- Prominent search field that slides into the nav as users scroll down, search appears across all pages
- Popular destination cards with see all button that links to results page sorted by popularity
- Specific category cards (eg. "Asian History", "Historic Concerts") to help the user grasp how destinations are organized
- Stories/articles from Zeit that help build trust with users
- Simple explanation for how Zeit works with a link to a more detailed page
- Customer testimonials
- Footer with links

## Search Results Page

- Cards displaying the destination with name, time period, price, length of stay, rating, and trip type
- Detailed collapsible filters for type of trip, region, time period, trip length, and price on left hand nav
- Toggle for card vs list view
- Applied filters appearing as closeable buttons above cards
- Sort by price, recency, popularity, and length of trip

## Category Page

- Will look the same as search results page except for the header and filters (example from REI Adventures below)
