

## PROVEN IMPACT

PLAN THE DAY WITH CONFIDENCE

# 24%

more accurate schedule  
predictions than EHR

STAY INFORMED IN REAL-TIME

# 95%

faster event updates  
<1 min vs. 20 min with EHR

GET HOME ON TIME

# 28%

fewer overtime minutes

## What if your day went as planned?

Most don't, leaving you scrambling to adjust — often the last to know what's changed.

But unpredictability doesn't have to be the norm.

Apella introduces a new way to run hospital operations: reliable schedules, delays predicted before they disrupt your day, and real-time visibility into what's *actually* happening across your sites of service — so hospitals run smarter and your day runs smoother.

Trusted by anesthesiologists nationwide:

APELLA FOR ANESTHESIOLOGY —

# Know what's actually happening across your rooms — in real time

Apella uses ambient AI to automatically detect procedure events and continuously update predictions for how the day will unfold. Anesthesiologists gain live visibility into case progress and emerging delays, with a reliable view of what's happening right now and what's next.

No manual updates. No delayed communication. Just one trusted source-of-truth shared across every room and team.

## How this helps your day run smoother

### Coordinate across rooms with ease

Board runners get a live view of all rooms, with continuously updated predictions to anticipate where staff is needed.

### Use your time with confidence

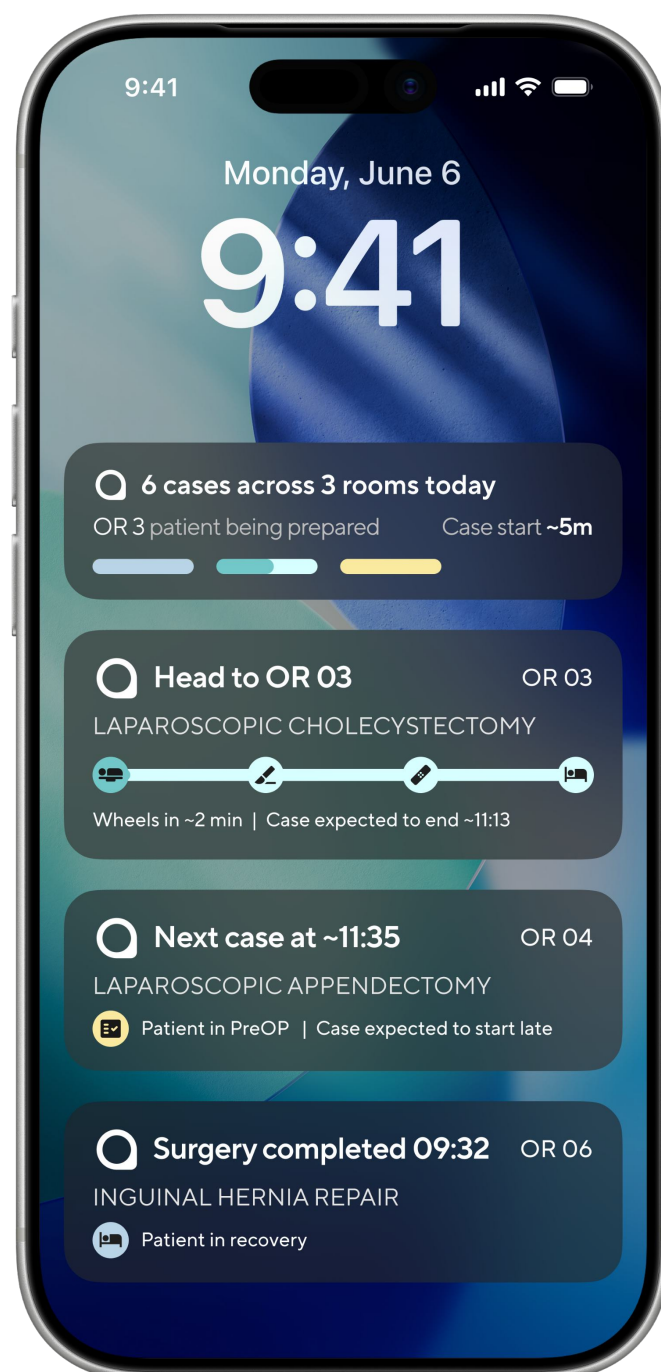

See live updates across your sites of service, so you can plan ahead, manage coverage, and cut time spent waiting.

### Stay informed automatically when things change

Receive automated alerts for events and delays. No more relying on calls to know where you're needed and when.

### Trust that everyone sees the same thing

Anesthesia, surgeons, nurses, and the full perioperative team stay aligned, using the same ground-truth insights.

Curious if this could help your hospital?

Share a few details and we'll take it from there.
