

PROVEN IMPACT

PLAN THE DAY WITH CONFIDENCE

24%

more accurate schedule
predictions than EHR

STAY INFORMED IN REAL-TIME

95%

faster event updates
<1 min vs. 20 min with EHR

MAXIMIZE YOUR OR TIME

28%

fewer delayed minutes

What if your OR day went as planned?

Most don't — leaving you constantly adjusting, tracking down updates, and reacting to delays you didn't see coming.

But unpredictability doesn't have to be the norm.

Apella introduces a new way to run the OR day: real-time visibility into what's actually happening, accurate predictions for when your cases will start, and earlier delay detection — so hospitals run smarter and your day runs smoother.

APELLA FOR SURGEONS —

Know what's actually happening across your cases — in real time

Apella uses ambient AI to automatically detect procedure events and continuously update predictions for how your day will unfold. Surgeons gain live visibility into case progress, patient readiness, and turnovers—along with early signals of delays—so you always know what's happening now and what's next.

No manual updates. No delayed communication. Just one trusted source-of-truth shared across every room and team.

How this helps your day run smoother

Direct visibility into your rooms, anytime

Get a live view into your ORs to check on room and patient readiness — whenever you need it.

Make the most of time between cases

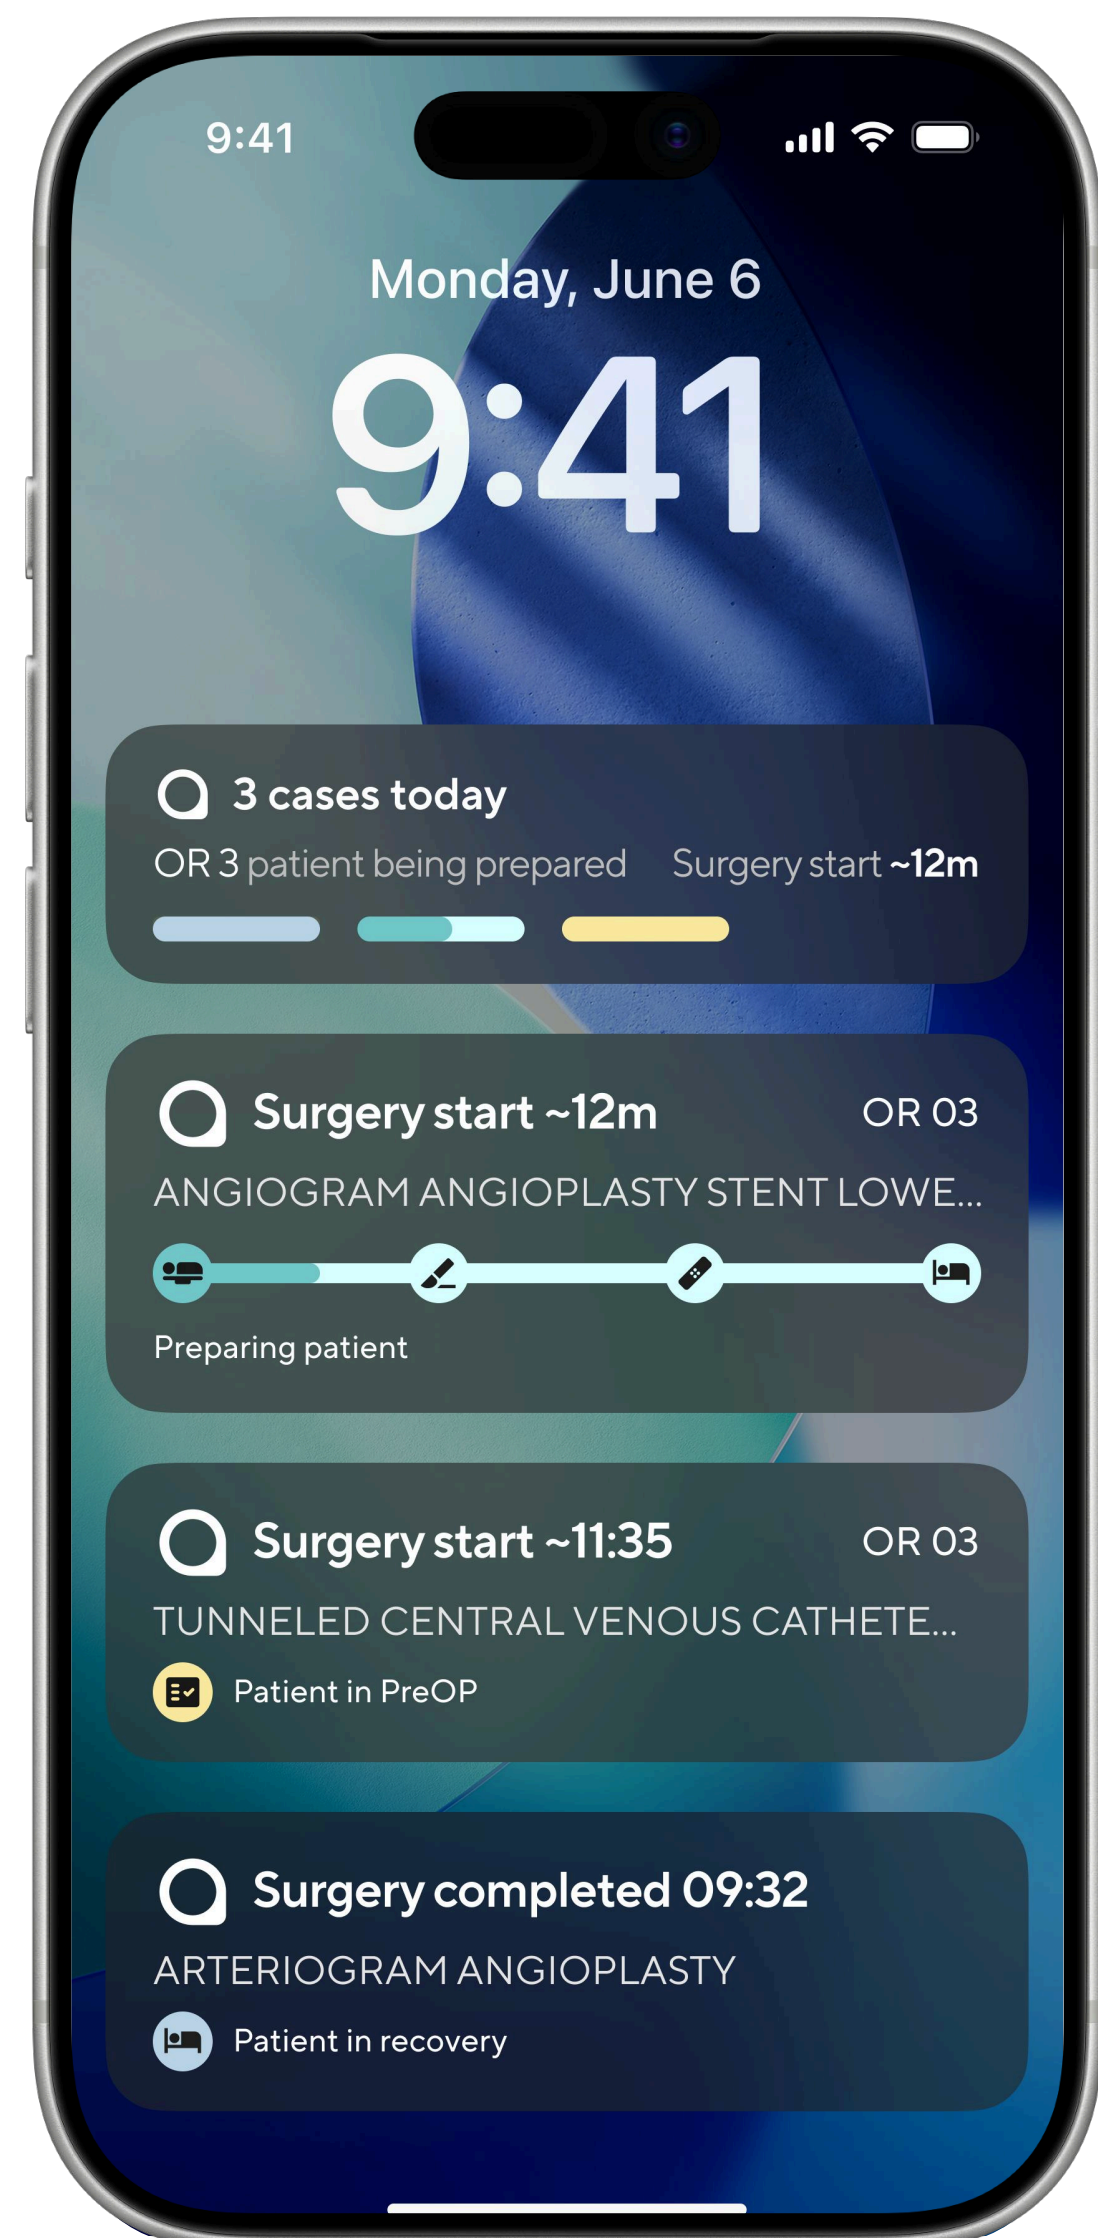

Know how much time you have before your next case, so you can plan ahead and avoid time spent waiting.

Know exactly when to head to the room

Receive automated alerts for key events and delays. No more relying on calls to know where you're needed and when.

Trust that everyone sees the same thing

Surgeons, anesthesia, nurses, and the full perioperative team stay aligned, working from the same real-time data.

Curious if this could help your hospital?

Share a few details and we'll take it from there.
