Using high-intensity broad spectrum ultraviolet light and a proprietary blend of metals, ASIET machines break down organic and inorganic carbon-based materials as small as 0.001 micron. Contaminants are converted into ash and vapor compounds such as water and carbon dioxide. The system is effective against bacteria, viruses, mold, pollens, dust, pet dander, smoke, odors and other airborne pollutants.

ASIET, Inc. manufactures and distributes ASIET 7700 mini, an air purification system that improves indoor air quality through UVC light and photocatalytic cell technology rather than filters.

The 7700 mini is a totally portable multi-stage photocatalytic oxidation (PCO) system. Cabinet options are available.

Technical Information

- **Removes harmful indoor pollutants**
- **Degrades organic and inorganic carbon-based material -- including dust, pollen, bacteria and viruses**
- **Disinfects and removes odors in both new construction and renovation projects**
- **Helps prevent the formation of mold and mildew**
- **Operates at room temperature, reducing burn and fire hazards**

<i>Dimensions</i>	16" x 16" x 8.5"
<i>Unit Weight</i>	34 lbs.
<i>Voltage</i>	110 v.
<i>Coverage</i>	2,000 sq. ft.
<i>CFM</i>	150-400
<i>Number of Bulbs in Unit</i>	2 (18 watt)
<i>Number of Reactor Pads in Unit</i>	3 (14" x 7")
