

AIR CUSHIONS

PROTECTIVE PACKAGING

Recycled content & recyclable film

Simple, reliable & affordable

**Greener.
Quicker.
Cheaper.**

70% less expensive than peanuts & bubble

Reduced landfill

Efficient shipping of materials

Just **one roll of our Air Cushions** replaces **six bags of Peanuts**, streamlining your inventory and cutting costs.

99% Air & 1% Recycled Material

A unique blend of minimum material and maximum protection. Air provides unparalleled cushioning for products, significantly reducing damages and returns. Our plastic with minimal content is made from recycled materials and can be recycled.

One Machine, Many Applications

Each machine can be used for multiple packaging roles, from compostable to recyclable films and 200mm cushions to 800mm bubble. This reduces your packaging inventory while also providing branding opportunities for your cushions.

Multiple Cost Savings

Further to savings on like-for-like materials, you'll also lower operational costs. One roll of film replaces four bags of Peanuts. Simply streamline your inventory by producing materials on demand and reduce your material, storage and delivery costs.

Affordable Machines

Our simple, quick and reliable machines start from just £340. You also have the option to free loan or rent the machines — something for all budgets and flexible to your changing needs.

No Minimum Order Quantities

Order what you need with no MOQs or contracts. This flexibility aligns perfectly with your dynamic business. We tailor products, deliveries, and prices to your business needs

Personal Service & Technical Support

FGP takes pride in personal service, ensuring a seamless transition to our packaging solutions. We'll be on your side from the demo, installation, training, and servicing to technical support with accessories for further efficiencies and beyond.
