

EXPERIENCE

Lead Designer

Jambb *Sep 2020 - Present*

As lead designer at a small startup, I am responsible for our product's design from the ground up. This includes information architecture, feature prioritization and validation, user research, visual and brand design, hiring, and assisting with development focused on the UI layer & responsive design.

Senior Product Designer

PathAI *Dec 2017 - Sep 2020 (2 years 10 months)*

As the first product designer and eventual manager of the design team at PathAI, I worked with our product team across the company's entire product suite to create next generation digital pathology tools. In addition to working on a number of major products and features, I drove the overall look & feel of our product suite, including our design system, internal & external tools, and a web-based slide viewer for conducting digital pathology.

Senior Product Designer

LogMeIn *May 2015 - Dec 2017 (2 years 8 months)*

As a senior product designer I worked at a product-wide level to oversee major transformations on LastPass, while assisting with other products and teams. My projects included core usability and onboarding, visual brand work, and product strategy.

Participated in several innovation and collaboration initiatives: Creating and driving usage of a company-wide design system and creating a new app that won our company-wide hackathon.

User Experience Designer

NGP VAN *May 2013 - May 2015 (2 years 1 month)*

Worked as a member of the product team to conceptualize, refine, and develop new features and experiences for users of our system. User testing, iterative design, and field research were particularly important due to the nature of the expert system being developed.

B2B Web Developer

AudioGO *Feb 2011 - Jun 2013 (2 years 5 months)*

In charge of overseeing and developing AudioGO B2B web interface. Responsibilities include developing and troubleshooting new features for our website and overseeing contractors for web development.

DESIGN SKILLS

User Research
Product Strategy
Information Architecture
Visual Design
UI/UX
Design Systems
