CORE CAPABILITIES

Large-scale structural steel, architectural and miscellaneous metalwork, glass and cladding

DESIGN & PROJECT MANAGEMENT	MANUFACTURING & FABRICATION	INSTALLATION & ERECTION
CAD detailing Measured drawings Tekla 3D BIM modelling Surveying using point cloud scanning Workbench project management platform Donesafe WHS management platform Augmented reality 'Hololens' QA software	1100m ² fabrication facility with 7 welding bays 2 bridge cranes with 6.5T lifting capacity Machining Linishing Bending Sawing High-volume manufacturing Steel, alloys, exotic metals and glass	Boilermakers Mobile 3T-crane Specialist riggers Working at heights Confined spaces Difficult access Maintenance and ongoing support

DISCRIMINATORS

- 360° service: early involvement, design to handover, every step of the way
- In-house: guaranteed quality of workmanship, traceability and responsible procurement of materials
- Security: DISP-assessed Essential-8 cyber protocols in practice, secure premises with designated Zone 2 Restricted Access area
- Sustainability: environmental, social and governance practices certified to the highest national standards
- Industry leader: endorsed RAP organisation, Women in Construction target, Net Zero 2030 strategy, mental health stigma-free employer, educational partnerships passing a culture of excellence on to the next generation

COMPLIANCE & AWARDS

- ISO 9001:2015
- ISO 45001:2018
- ISO 14001:2015
- Defence Industry Security Program (pending)
- EcoVadis Bronze medal
- JOSCAR-AU Level 1 Registered

PROJECTS

- **DoD Moorebank Unit Relocation**, 2015, Laing O'Rourke, \$4.4M, Miscellaneous metalwork
- **Quay Quarter Precinct**, 2021, Multiplex, \$21M Spiral feature stairs, structural steel reinforcement
- **Parramatta Light Rail**, 2023, Laing O'Rourke, \$14.6M Miscellaneous metalwork, rail stop canopies
- **Sydney Opera House**, 2021, Taylor, \$6M Structural steel reinforcement

*BASED ON PROJECTS 1998-2023

Icon Metal's extensive experience in construction, combined with a strong reputation for quality across the industry, positions us as a trusted partner for Defence projects. Our compliance accreditations ensure that all products meet the stringent standards required by Defence operations.

Operating from secure premises, our comprehensive in-house capabilities provide full control over the manufacturing process, safeguarding both the quality and integrity of every product. This integrated approach not only guarantees consistency and reliability but also supports sovereign capability by ensuring that critical manufacturing expertise and production remain securely within Australia.

We consider our capabilities to be applicable to the following three key areas of the Defence supply chain:

◎ MARINE MANUFACTURING

Vessel (see diagram) and dockside:

- stairs
- ladders
- gantries, gangways and walkways
- static items (beds/tables/work stations)
- balustrades
- grates
- brackets
- metal racks
- trailers and ramps
- tooling jigs
- dollies

◎ MATERIEL SUSTAINMENT

Buildings, vessels, infrastructure (fences, gates, balustrades etc):

- maintenance of military equipment and assets
- scheduled and responsive support
- compliance
- repairs
- disposal

◎ INFRASTRUCTURE

Major projects requiring construction management experience:

- project management
- drafting and BIM
- fabrication to AS/NZS5131
- installation
- structural steelwork
- miscellaneous items: fences, gates, screens, balustrades, bollards, ladders, gantries, handrails, bump rails, corner guards, etc
