## Company Overview

# About Hubject

Hubject simplifies the charging of electric vehicles. Through its eRoaming platform interchange, the eMobility specialist connects Charge Point Operators (CPOs) and eMobility Service Providers (EMPs) to provide standardized access to charging infrastructure. Hubject operates the world's largest cross-provider charging network, connecting over 1,000,000 charging points and more than 2,750 B2B partners across 70 countries. Hubject is also a leader in Plug&Charge technology, using ISO 15118 -2 and -20 standards to deliver secure, seamless EV charging experiences.

**Founded**  
📅 Mar 2012  
Berlin, Germany 🇩🇪

Founded by:  
BMW, Bosch,  
Daimler (Mercedes-Benz),  
EnBW, Innogy (E.ON),  
Siemens

**Entry into non-DACH markets**

📅 Q4 2014  
BE, DK 🇧🇪 🇩🇰

**Investment from Volkswagen** 🇩🇪

📅 Q2-Q3 2017

**First OEM using Plug&Charge**

📅 2018

📅 Sep 2019

**Hubject achieves profitability**

📅 2022

**1m + CP connections reached**

**Hubject Singapore founded**

**Launch of Hubject Financial Services**

📅 Sep 2024

# Meet our CEOs

**Christian  
Hahn**

CEO

Christian Hahn is CEO, Managing Director and Spokesperson of the Board of Hubject, the company behind the world's largest interoperable charging network for electric vehicles. Hubject connects over 1.1 million charging points and 3,500 B2B partners across more than 75 countries, which makes Christian one of the most connected and influential figures in global eMobility. His focus is on the strategic and technological challenges of building open, collaborative infrastructure in a fragmented market. That groundwork speeds up EV adoption and makes electric mobility practical and seamless for millions of drivers.

Under Christian's leadership, Hubject plays a central role in building the connected, interoperable charging infrastructure needed to scale sustainable mobility. He and his team stand at the intersection of technological innovation, infrastructure development and market readiness. That position affords a clear opportunity to shape a competitive, resilient and future-ready eMobility ecosystem.

Christian has a long-standing presence in the Global eMobility Industry and holds several roles that shape its policy and standards. He has served on the board of E-Mobility Europe, the leading European association representing the eMobility sector, for the past two years. He is also one of a limited number of industry representatives in two European Commission Sustainable Transport Forum (STF) sub-groups: the PKI sub-group and the sub-group on data, governance and standards.

Through these roles, he contributes directly to the frameworks behind secure, interoperable charging across Europe, including Plug&Charge. In Germany, Christian has been elected to the E-Mobility Steering Committee of BDEW (German Association of Energy and Water Industries).

Christian brings deep expertise in energy sector transformation from six years at PricewaterhouseCoopers in Berlin. There he specialised in strategy and business development for energy companies, smart grids and intelligent networks. He started working on electric vehicle projects in 2008, which makes him one of the industry's early pioneers. This background means he can speak credibly about where energy systems, transport infrastructure and business strategy meet in eMobility.

He holds a master's degree in industrial engineering, with a focus on circular economy, energy management and change management. That combination is useful every day in an industry where technical innovation and organisational change happen at the same time.

# Meet our CEOs

**Prodromos  
Siapkas**

CFO

Prodromos Siapkas is Chief Financial Officer at HUBJECT, where he leads global finance for the company shaping interoperability in electric vehicle charging. Prodromos combines future-oriented strategic judgment with rigorous execution.

He has spent his career turning finance into a growth engine – restoring investor confidence at businesses under pressure, scaling finance functions through hypergrowth, and giving executive teams the clarity to move fast with discipline.

That range spans listed corporates and venture- and private equity-backed scale-ups across technology, mobility, energy, and industrial sectors. Most recently, as CFO of SunRoof, he led a full strategic and financial reset – following an interim CFO mandate at Jolt Energy. Earlier, at sennder, he built the company's FP&A function from the ground up during a period of hypergrowth, going on to lead Corporate Finance, Treasury, and Finance Operations across Europe. His foundations were laid co-owning P&L performance at Amazon and sharpening cost discipline at Lafarge.

He holds an MBA from HEC Paris and an engineering degree from Imperial College London – a foundation that gives his approach to finance leadership an analytical, systems-driven edge.

# Meet our CEOs

**Carsten  
Puhl**

CEO of Hubject Financial Services

Carsten Puhl Graduated from Saarland University, Germany, where he studied information sciences, English literature, and American studies. He began his career at Mobile City GmbH as data protection before becoming chief operating officer at Wirelance GmbH, where his primary focus was on mobile parking solutions, electromobility services and data security. Carsten joined the Hubject Consulting Team as a senior consultant in March 2018. In January 2019 he was promoted to chief technology officer and member of the board of directors where he was responsible for product and software development. In January 2023 he was made director of financial services for Hubject where his main focus was on financial regulations. He held this position until May 2024 when he was appointed as managing director of the newly-formed Hubject Financial Services.

# Meet our CEOs

**Trishan  
Peruma**

CEO of Hubject North America

Trishan Peruma is the CEO of Hubject North America, leading operations across the U.S., Canada, and Mexico. He oversees the growth of Hubject's Plug&Charge ecosystem and Interchange eRoaming network while advising on product and consulting strategy. With over 12 years of global experience in energy and eMobility, Trishan has held leadership roles at Shell, Pod Point, and ViriCiti.

He has led EV charging software and infrastructure projects with major transit agencies, including LA Metro, the Toronto Transit Commission, and the Chicago Transit Authority. Trishan holds a Master's in International Law from the University of Sydney, with a focus on energy and climate policy, and a Bachelor of Business from Monash University.
