Archi-Line is a state of the art aluminum batten product that mimics the look, feel, and texture of real wood. Using a revolutionary sublimation process, Archi-Line offers an extensive range of realistic finishes to complement any project.

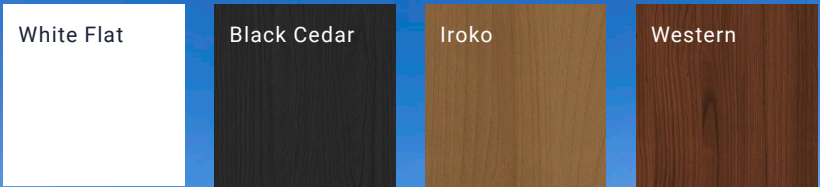

Based on a 2-part system; the backing component is fixed to the substrate, then the batten is clipped on to conceal the fixings for a seamless finish. Archi-Line is available in a variety of shapes and sizes that can be used with our batten extenders, spacers, and backing systems.

The range includes traditional warm, woody hues as well as contemporary black and white finishes. Archi-Line aluminum battens offer a durable alternative to timber, featuring minimal colour change over time. Elevate your design with Archi-Line’s versatile options tailored to enhance your creative vision with ease and elegance.

Stocked Range (5650mm lengths):

50mm x 25mm | 50mm x 50mm | 50mm x 100mm

Other colours and size options are available on request

Typical Applications

- Residential & Commercial
- Interior & Exterior Feature Walls

Benefits

All of our modular profiles give you incredible customisation with:

Profile shapes and sizes | Spacing preference | Batten angle options | Different backing alternatives | A range of finishes

COLOUR STABILITY

All of our colours have been rigorously tested to withstand the most extreme environments.

SCRATCH RESISTANT

A topcoat of exterior grade paint is baked on to provide resistance to chipping, flaking, blistering and scratching.

ECO FRIENDLY

Archi-Line uses VOC free coatings and lead free finishes.

NON COMBUSTIBLE

Archi-Line achieves Group Number 1-S.

DURABILITY

Archi-Line excels in wet conditions, with built-in protection against swelling, mould, and rust, ensuring long-lasting durability and low maintenance.

LOW MAINTENANCE

Our specialised finishes have outstanding properties to ensure ease of maintenance and longevity of your surfaces.
