ABOUT XPRESS FENCE

An innovative modular aluminium fencing system featuring a patented push-together design for fast, hassle-free installation. With its unique friction-fit slat system, there's no need for individual slat fastenings (aside from the top slat retainer), resulting in a sleek, seamless appearance. Designed for versatility, Xpress Fence allows you to create custom fence widths and heights with ease. The system includes 9mm standard Spacer Blocks for easy slat adjustment, and optional 20mm Spacer Blocks are also available (sold separately) for added flexibility. Xpress Fence can be easily fabricated on-site using standard aluminium cutting tools, making it ideal for a wide range of outdoor and landscaping projects. Available in a selection of contemporary powder-coated colours, Xpress Fence delivers both style and durability – The perfect solution for your next fencing project.

FEATURES & BENEFITS

- » Fixing free slat friction fit system.
- » Lightweight.
- » DIY and easy to install system.
- » Flat pack in a box; easy to store, transport and handle.
- » Slat spacing can be adjusted with 9mm or 20mm spacer blocks.
- » Pre-finished - Low maintenance/powder coated finish.
- » Simple to adjust height and widths on site using conventional cutting tools.

TYPICAL APPLICATIONS

- » Residential, commercial, landscaping, privacy perimeter/ boundary fencing and screening applications
