Re: DSMC Letter – 8th Interim Analysis

Dear Drs. Tong and Davis,

The SNAP DSMC met on June 30, 2025 to review its progress and the eighth interim analysis, with the aid of the statisticians who generated the interim analysis report.

Based on the data reviewed at this stage, we recommend **Close the Adjunctive Domain for adults**; a statistical trigger for futility was met. Pediatric enrollment may continue.

Sincerely,

A handwritten signature in black ink that reads "David T. Huang".
