

Click-It™ Valve Locator

The CLICK-IT™ is a practical, cost-effective way to locate and identify irrigation solenoid valves, making valve location a one person job. Connecting a single CLICK-IT™ to an irrigation system controller activates the solenoid valve by causing it to rapidly click, allowing them to be quickly located by a service technician or installer. Quickly locate any valve box without the need for large expensive wire and valve locators.

FEATURES

- ▶ Locate solenoid valves quickly and easily
- ▶ One easy hook-up to check or find all valves
- ▶ Allows for one-person valve location
- ▶ Solid-state circuitry
- ▶ Contractor tested
- ▶ Compact and water resistant
