FIND THE PRESCRIBED HEIGHT

HOW TO CONFIGURE THIS SECTION

1. Find the desired seat-to-floor height in the left column. 2. Select an available wheel type in that row. 3. Select a caster size – note that combinations differ in how far the seat-to-floor height can later be adjusted, shown on each caster option. 4. Select an available locking mechanism. 5. For 20 / 22 / 24" wheels, complete the tire and handrim block below.

‡ wheel position is not compatible with the Extended Rear Seat Rail (3101-3110). * anterior tilt is not available with the 13.5" / 34 cm seat-to-floor option. Tire and handrim choices apply to 20" / 22" / 24" wheels only. Front rigging length must be shorter than the seat-to-floor height selected. → 19" on a caster option is its **seat-to-floor adjustment range** – the highest seat-to-floor height that same wheel and caster reach, so a chair ordered at 15.5" can later be raised to 19"; **max** means the combination is already at its highest – adjusting within it does not require a new wheel or caster.

WHEELBASE POSITION WIDTH-LINKED

- ☐ Default – Leggero selects optimal by chair width
- ☐ Position 1 – Minimum 17.5" / 44 cm
- ☐ Position 2 – Medium, Shifted Front 18.5" / 47 cm
- ☐ Position 3 – Medium, Shifted Rear 18.5" / 47 cm
- ☐ Position 4 – Maximum 19.5" / 49 cm
