

www.1transfer.io

The blockchain transfer agent for the digital world

1transfer, a stock transfer agency built on Blockchain protocol is a revolutionary solution that transforms the traditional stock transfer process. 1transfer leverages the benefits of blockchain technology such as transparency, immutability, and security to create a more efficient, accurate, and cost-effective stock transfer system.

1transfer enables stockholders to securely manage their holdings on a decentralized ledger and custodian, eliminating the need for intermediaries such as brokers.

By utilizing blockchain protocol, 1transfer will reduce transaction fees and provide faster settlement times.

In addition, 1transfer ensures compliance with regulatory requirements by automating the verification of shareholder identities and ownership. This reduces the risk of fraud and errors, while also increasing transparency and audibility.

1transfer is built on an open-source blockchain protocol, making it accessible to a wide range of users and developers.

Its flexibility allows for easy integration with existing systems, making it an ideal solution for Issuers of all size companies in various industries.
